

Sport tourism

Honestly, this was my first time to visit Brooklyn Bridge Park. Visiting Brooklyn Bridge Park was giving me a good and unforgettable experience for me.

Sport tourism is an important topic for people who travel to a place. They have different feeling and experiences in some ways by doing some activities.

During the class trip, I observed some people who running and walking dog in the morning when I was walking around the hotel. The weather is actually a little bit cold in that day, but they keep doing it, probably every day. I saw there are a few basketball courts from a distance. I believe that there will be a lot people doing sports during summer in Brooklyn Bridge Park, Including Soccer, fishing, riding bikes, even boating, and so on.
