The Best Wishes

Hiuling Yen
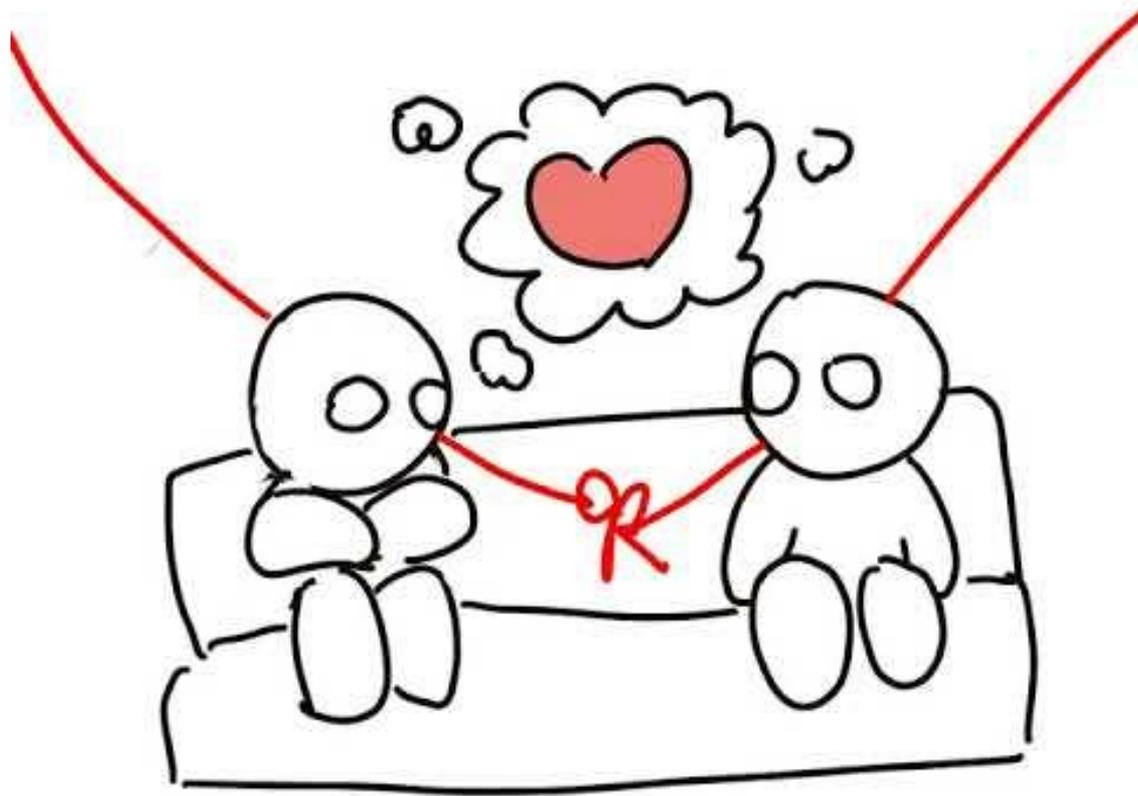

Intro to project

I would like to use the culmination project as an opportunity to create my first 2d animation work. My goal is to be able to use 2d animation to present my story. So that people can understand the story I want to tell by watching my work. I chose to use 2D animation because it is much easier and faster than film. It's easier and faster than just textual narration 2d animation can give people a more intuitive understanding and feeling. My ideas were quickly recorded and easily changed. And I also have experience in doing similar 2d animation before.
