

For this logo, I wanted it to represent fire and Leo the star sign and my initials. Since I feel like some Leo characteristics represent me I wanted to express the element of the sign fire in this logo. It's a bit more abstract but it still somehow looks like a flame wrapping around the letters. My banner is representing a lion who is origami from my star sign Leo and he's in a bright environment and is independent and powerful. It represents me as a person and my sign. My Tagline is "Let the passion keep burning inside of you." My logo shows fire on it and a lion in astrology is known to have fire characteristics so it relates to the logo and banner
