

### **About Jasmin Hernandez...**

*Growing up, I've developed an interest in the creative arts field. Ever since a young age, I would be lying on the floor with three coloring books and five crayon boxes. In elementary school, my favorite subject was art because I was able to use watercolors and oil pastels. Everything that had to do with me doing something from scratch was the best. In high school I was enrolled in a graphic arts department in which made burst a new interest in design. I'm learning everyday more and more of this area that seems so 'unprofessional' yet is used all around us. To add on, I'm striving to be an example for my family. I want to be an example for my two younger brothers who are slowly but quickly growing up, and be able to pay my parents a minimum cost of making them proud everyday. I am the first in my family to be attending college and I believe that the God that I service has everything in control.*

# ALPHABET BOOK

*Type & Design Principles*

A decorative background consisting of numerous circles of varying sizes, some solid black and some light grey, scattered across the right side and bottom of the page.
