Thank you for all your work on this.

I think a good strategy would be that we create a list of the student decathletes and most involved faculty in the project. But this should be called out as such and we can give general numbers about how many people were involved. Over 400 students and 60 faculty.

Decathletes			0			\mathbb{H}	#	Ш	#	#

Subject: Fw: SD Description

Alexander-

Attached please find the spreads we have prepared for the SD to be featured in the next issue of TECHNE. We would like to list the students (and faculty?) involved in the project. Do you think we need the list every student in the list you sent? We have been listing the project teams on the first page that introduces the project, but if we needed to include all of the students names I suppose we could just include a list of everyone involved after all of the text.

Let me know what you think.

Thanks, Ting
