Community

Gentrification is a widely discussed topic in my neighborhood. The pandemic, starting in 2020, has led to the closure of numerous black-owned businesses due to insufficient support and ineffective bank loans.

A significant number of small black enterprises are facing challenges in obtaining loans from banks, as they are perceived as unlikely to repay.

This has exacerbated the economic struggles within the community.

# Addressing the challenges of adversity

# Addressing the challenges of adversity

Addressing these issues requires a multifaceted approach involving community engagement, policy changes, and collaborative efforts between government, businesses, and local organizations.

# Fostering Creative Ideation

# Design goals

## User freindly flow

- A user-friendly flow ensures that users can navigate the app **effortlessly** and complete tasks without frustration.

## Marketing and Promotions

- Empower local businesses to offer **targeted promotions**, fostering community, and boosting **customer loyalty**.

## Customer Reviews and Ratings

- Introduce a review system for **customer feedback**, building credibility with positive reviews and guiding improvements through constructive feedback.

# Competitive Analysis for Business Success

# Competitive analysis

Studying competitors helps designers understand user expectations within a specific industry or niche.

01

**TO FAR OF A COMMUTE AND EXTENDS  
BEYOND A REASONABLE DISTANCE**

Like other e-commerce platforms, there are concerns about the authenticity of some product reviews, so users should exercise caution and seek information from multiple sources.

02

**THIS APPLICATION COMES WITH  
A HIGH PRICE**

Concerns arise about online courses and lessons being costly; while this may not appear to be a problem, it made me anxious and prompted me to look for alternative resources.

03

**USER INTERFACE COMPLEXITY**

Some users find the app's interface to be cluttered and complex, especially for those who are new to online shopping or prefer simpler designs.

04

**NAVIGATING THE INITIAL LEARNING  
CURVE**

New users, especially those with limited technical expertise, may initially find Shopify's interface and features challenging to navigate.

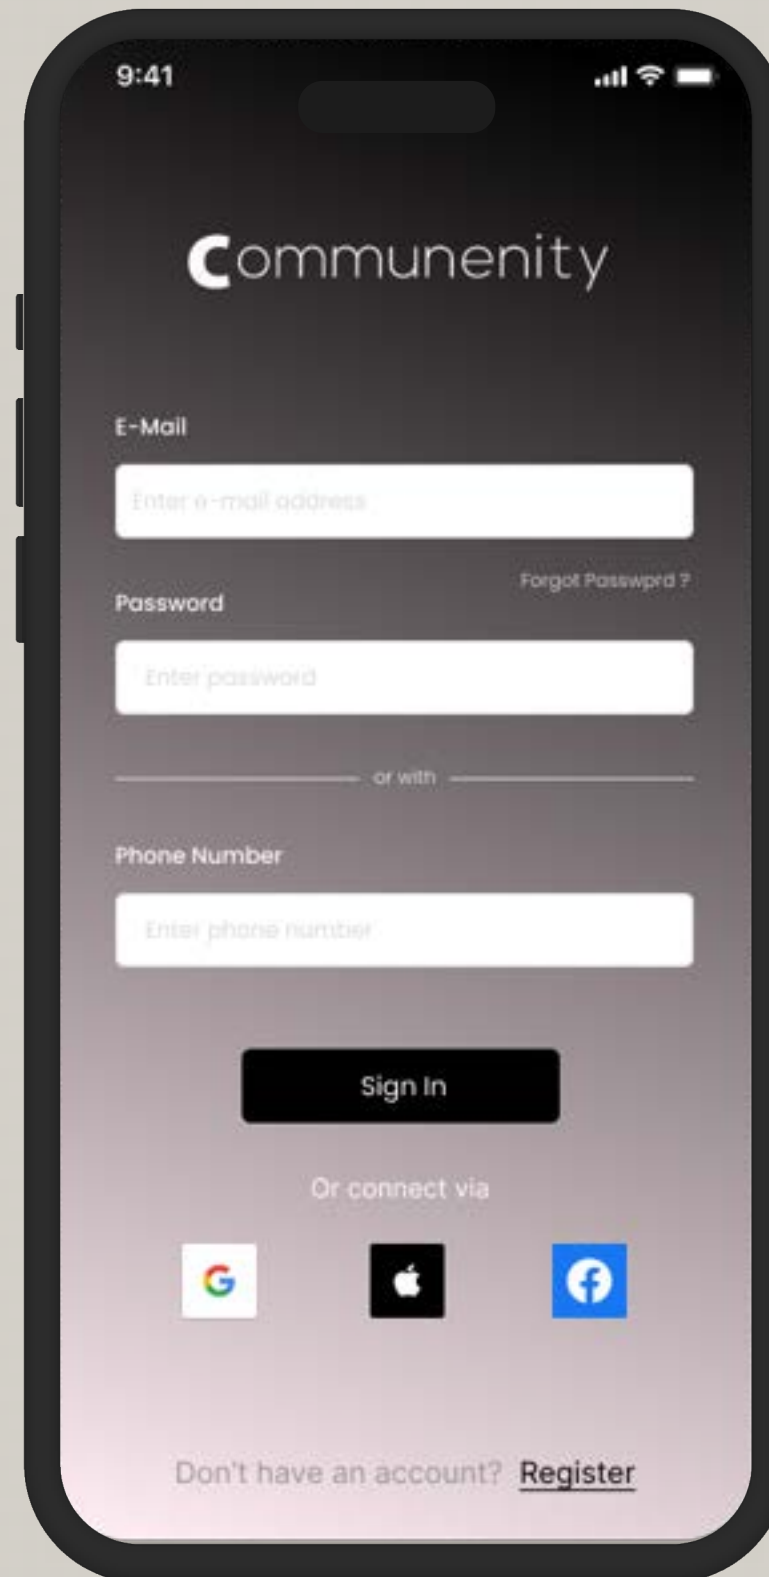

# Final solution

# Design audit

Existing tool

- **App logo**

The logo is fully displayed on top of the login credentials.

- **Forgot password**

Users have the option to get a password change.

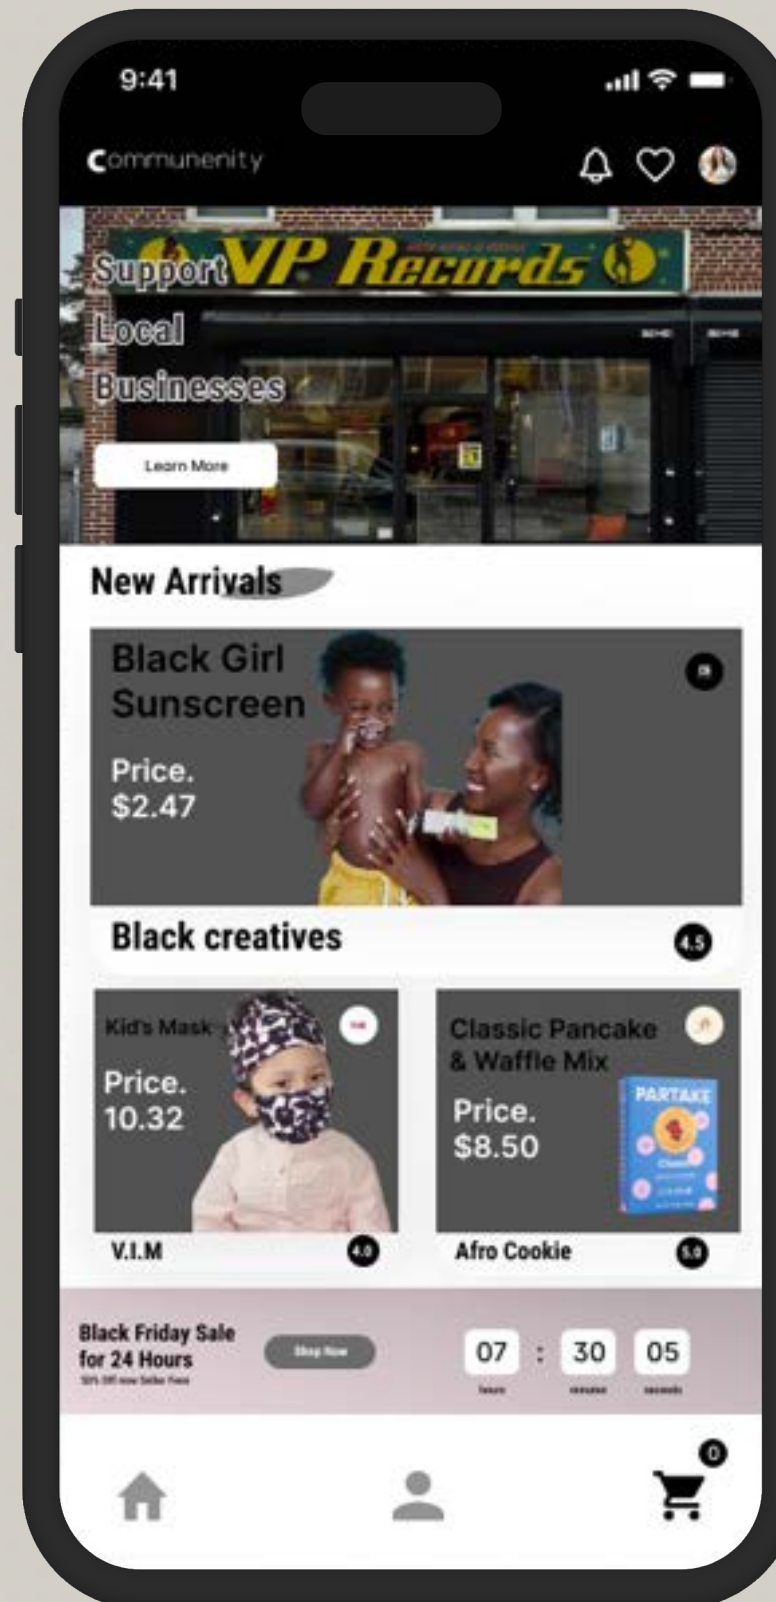

- **Login options**

Other primary accounts could be used to sign in automatically to the app to reduce login times.

# Design audit

Existing tool

## ● Business of the week

Spotlights selected local businesses every week.

## ● New Arrivals

Users are greeted with different products from businesses every week.

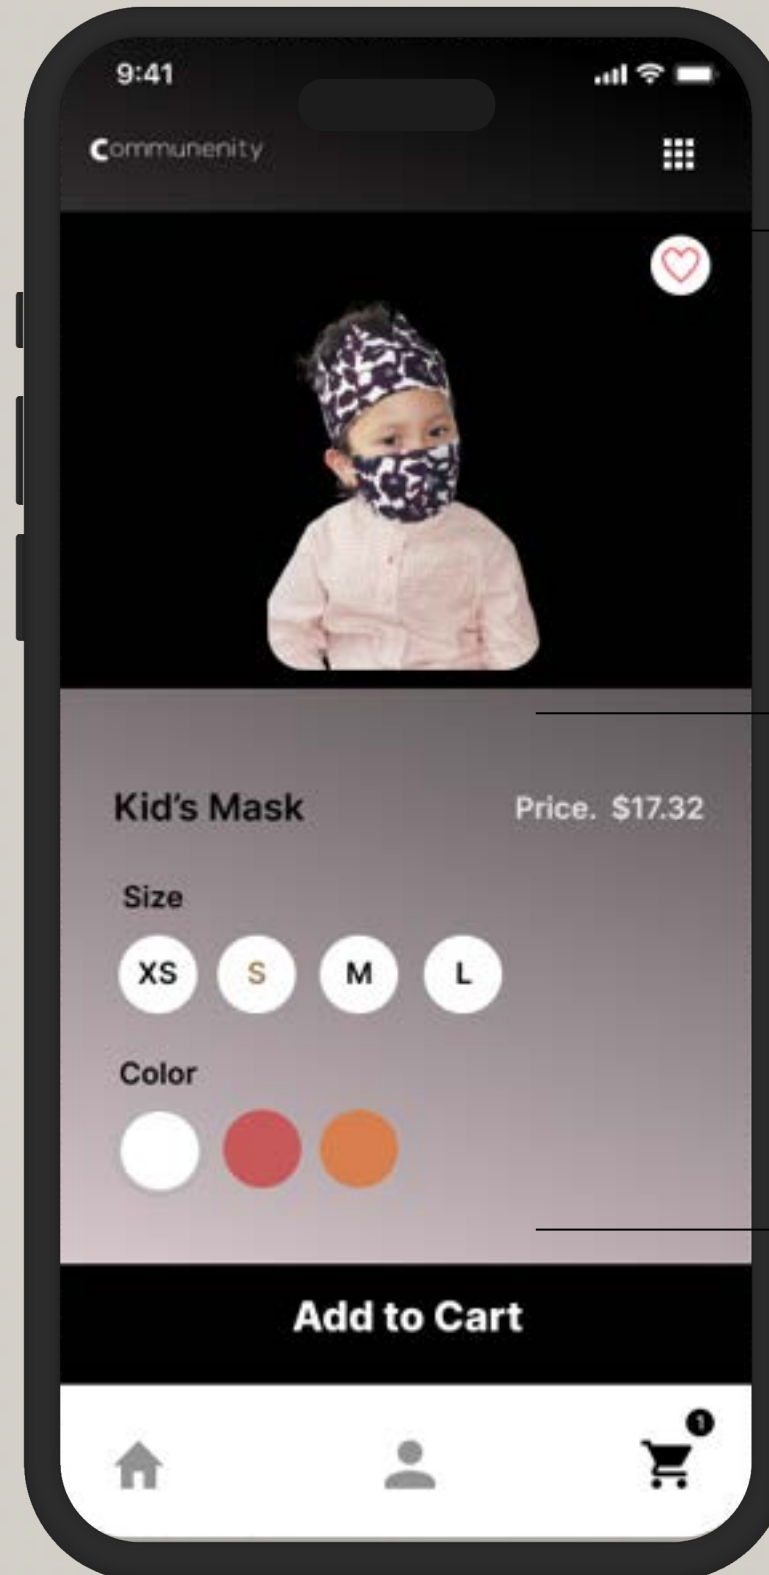

## ● Customer reviews

Customers can share their opinions and experiences with products they have purchased through videos, words, and ratings.

# Design audit

Existing tool

- **Save an item**

The heart icon is used to save items you might like for later.

- **Swipe left**

Users who swipe left will land on the previous section.

- **Alternatives**

Having multiple alternatives to choose from if you find something you might not like is our top priority.

# Reflection

# Learnings

- Design with purpose
- Question everything
- Do the extraordinary

# Next steps

- Fully complete the finalized designs of the app
- Carry out user testing
- Conduct more interviews

Thank you
