Good Afternoon,

Thank you for the feedback, we will follow up with students. We really appreciate that you came by to the event, even though you are a vary busy person. I sincerely thank you on behalf of CIA. Students came late we ended the event around 4pm and most of students have similar problem like Farjana, I think something is need to be done in order to improve students technical skills. I party joined in your presentation, it was informative and vivid. If you could send me the power point slides that will be great.

Sincerely
Md Arefin

Forjana

- Don't say that the job is easy.
- Poor programming knowledge. Perhaps don't emphasis Java and C++, instead maybe emphasize matlab?
- Weak critical thinking.
