Chocolate lux

Introduction

I'm a designer of chocolate lux, and I started with two of my designs. I bought polyester fabric and silk fabric from moods fabrics store. It took me four days to make a red dress and blue two-piece shirt and skirt. It was intense for me because, as a college student, it was hard to catch up with class work and homework, but it paid off, and I showed my work, and I feel great putting my designs out there. We need rehearsals, and we zoom in on meetings. My part was designing clothing and making the clothes. So I need more connections, and I'm going to start an online business.
