

Kiara Martinez

I learned about supply and demand. I learned that supply is high and demand is low. When demand is high, supply is low. I learned consumer goods and services are those new or used goods and services, including mobile homes, that are used or bought primarily for personal, family, or household purposes. Consumers' goods and services are people's decisions regarding their wants and needs in everyday lives. Most companies benefit from consumers' goods and services, people consume more things for a comfortable lifestyle. I learned from graphs of microeconomics and different curves of supply and demand.
