

Omar Richards
Notes

Polysemy brings up the question that is formed with destruction (???????)

linguistic messages guides interpretation for symbolism

the system of the connoted message is naturalized by the syntagm of the denoted message

what does it mean to be naturalized

connoted messages may just be the surface as there may still be denoted ones.

a denoted description of an image is often incomplete

all images are polysemous meaning they have implications and significations that some readers see and others dont

analyzing a photograph offers linguistic, coded iconic, and a non-coded

iconic message

images can have signs that should be heavily interpreted

literal image is denoted and the symbolic one is connoted
