

WHAT THEIR CRY MEANS TO ME

is an article that talks about different kinds of hardships black people were faced in the 1930s. For most black people they couldn't afford education and a great living environment. Moreover, black people are having social problems like discrimination and hatred. Under these tainted glasses, black people always got into crimes, violent events, and troubles. So these social problems lead to the creation of Black Mulism. The Black

Muslim is a religious group that is existed for protecting black people. They have to build a black community by themselves. They build schools, adult training, and job opportunities for black people. However, the Black Muslim group is more like an anti-white group, they will call white people "white devil". They would point out the how badly the whites are. For example make judgement in their skin-tone, religious, how their hair aren's straight. Also how white schools and teacher are telling them to hate themselves

**After Reading the article,
It Reminds Me of
Lynching in America
in 1950s**

AND...

BLACK LIVES MATTER

WHAT IS “BLM” ?

BLM (Black Lives Matter) is a social movement against police brutality in black people. The key point that triggers the BLM to happen was a white policeman knelt on a black man Geroge Floyd's neck for 9 minutes in public. Meanwhile, Floyd was saying that he couldn't breathe. However, the policeman didn't listen or stop his action. So it causes the death of Geroge Lloyd.

WHAT DO I THINK ABOUT BLM?

I support the idea of BLM, within the action that the white policeman did to Floyd. It's because if Floyd was accused of crimes. We should arrest him or put him on a trial. But not abuse in police power. Everyone has their right to own justice and equality. So to remove the idea of abusing power, discrimination and reflecting the problem

that's in our society, a social movement like BLM is needed. Our Voice matters, and we need a response or a change. However, I don't agree with the violent events like robbing and burning that happens in BLM. I think we can have a better way of solving or reflecting on this problem as nonviolence. Like the movement Mahatma Gandhi did in India, “Sit in”. Also, if we use violence to solve another violent event. We are turning ourselves into the kind of person that we didn't like.
