

## Arch 1290 Architectural CADD & Arch 1200 Architectural Drawing II

### It's an Architectural Scavenger Hunt

**Teamwork:** While on the field trip your team will be responsible for documenting (sketch, photo, writing) each of the items on this list. **Each team member must contribute to each category so if it asks you to find an example and you have 5 team members you must find and document 5 instances.**

**Team Presentation:** Each team will need to present a PowerPoint slideshow of their findings. There should be 1 slide for the answer to each of the questions on the scavenger hunt. Include photos with titles. The last few slides should show the proposed subjects of the individual case studies - one slide per team member.

**Individual Work:** While on the field trip each of you will need to identify and document the subject of your individual case study. The final case study will follow: at this point you are identifying, documenting and presenting to us what you will be working on.

**Individual Presentation:** Each student will need to present images and a description identifying the subject of their own case study. This must be presented as part of the teams PowerPoint presentation. The full case study will include development of drawings (plan, section, isometric) images and detailed written descriptions.

### Slideshow Presentation

The slideshow presentation will require each member of the group to speak.

Divide up the work and decide in advance who talks about each slide.

The presentation should look professional in all respects.

Slide 1 - Course & Professor Info  
 Slide 2 - Team Interviews (from website)  
 Slide 3 - Photo Collage of site visit  
 Slide 4 - movement  
 Slide 5 - expansion  
 Slide 6 - failure  
 Slide 7 - retrofit Fix  
 Slide 8 - redesign Fix  
 Slide 9 - Case Study Proposals  
 (1 slide per team member)

**Arch 1290 Architectural CADD & Arch 1200 Architectural Drawing II**

**Team Work**

**1. Document an example of movement?**

---

---

**2. Document an example of an expansion joint?**

---

---

**3. Document evidence of a point of failure?**

---

---

**4. Document evidence of a design that was retrofitted due to failure? (a fix)**

---

---

**5. Document something that you could improve by design? (a fix by you)**

---

---

**Individual Work**

**1. Identify the subject of your individual case studies?**

---

---
