

SITE REPORT #2B due October 16

Name: Davit Khomasuridze

Date: October 16

FURTHER RESEARCH

Choose and revise one of your QUESTIONS for FURTHER RESEARCH from part 1A of this report.

Revised Research Question:

What was the reason of Bruce Ratner's design strategies for Nets new arena in Brooklyn?

Find a book, article, government document, or map that could help you answer your question.

MLA Citation for Book, Article, Government Document, or Map:

Bagli, Charles V. "Developer Scraps Gehry's Design for Nets Arena." *New York Times (1923-Current file)*, Jun 05 2009, p. 1. ProQuest. Web. 13 Oct. 2018.

Why did you select this source? How does it address all or part of your research question?

I chose this source because it states the reason of the strategies Ratner take while designing Barclays Center. The original design was a glass walled arena by very famous architect Frank Gehry, but it would cost Ratner one billion dollars, which would be too expensive for 22-acre Atlantic Yards development in Brooklyn.

Describe the process you used to find this source including any keywords and the search engine or tool you used to search. If you found it during our Brooklyn Collection site visit, how did you find it?

My process involved New York Times digital archive. I tried couple of keywords but did not find much useful information for me until I wrote "Barclays center design Ratner" in search bar and I found article called "Developer Scraps Gehry's Design for Nets Arena", which answered my question.

What other sources or further information would help you answer your question? Where would you look for them?

I would check more articles in New York Times archive and even in daily eagle to research more behind this decision.
