FURTHER RESEARCH

Choose and revise one of your **QUESTIONS for FURTHER RESEARCH** from part 1A of this report.

Revised Research Question:

How did the New York City Subway system being developed in the past hundred years and what they planned to improve it in the near future?

Find a book, article, government document, or map that could help you answer your question. MLA

Citation for Book, Article, Government Document, or Map:

Derrick, Peter. "Development of New York City Rail System." "Tunneling to the Future-The story of the Great Subway Expansion That Saved New York", April, 2002.
http://www.ejrcf.or.jp/jrtr/jrtr23/pdf/F14_Derrick.pdf

Why did you select this source? How does it address all or part of your research question?

I chose this source because it greatly explained how the New York City Subway system developed under many factors such as the increasing population and desires for new ways of transportation. The author for the article is Peter Derrick which was the archivist for the Bronx County Historical Society. The data he collected was creditable. Second, he indicated the development stages of the New York City Rapid Transit System under different years, this greatly help me to distinguish how exactly was the New York city subway develop in each period, and I can also focus on the changes of the constructions brought by the subways system.

Describe the process you used to find this source including any keywords and the search engine or tool you used to search. If you found it during our Brooklyn Collection site visit, how did you find it?

I first used the Google scholar and trying to find out some useful information, then I used the library website and enter the key words which was "Development of New York City Subway", "History of New York City Subway", and "The changes of constructions around the Barclay Center". I also found some useful mapping informations for my future research on the changes of constructions around the Barclay Center and the changes of the rail system under the Barclay Center which introduced by the professor and the library guide in Brooklyn Collection library.

What other sources or further information would help you answer your question? Where would you look for them?

I need to find out some more information about the changes of commercial buildings around the Barclay Center and the changes of transportation routes around this area. For the methods which I use to find out these informations will be the Brooklyn Public library and the library website and the Google Scholar research engine.
