Why did you select this source? How does it address all or part of your research question?

I selected these two sources because it is clearly talking about my research question. The first one is an article that talks about how important to make changes in the Atlantic Yards because it is the heart of Brooklyn. And it also discusses how can this changes impact on people in this area. The second one is a government document. It talks about how the Atlantic Yards will look like in the future. It also shows the gentrification that the city planning to do in this area.

Describe the process you used to find this source including any keywords and the search engine or tool you used to search. If you found it during our Brooklyn Collection site visit, how did you find it?

I used “Atlantic yards gentrification” and “Atlantic yards future” as keywords to get some good source about my research question. I found out a lot of good articles, government document, and reports online that talk about my theme. The Brooklyn Collection site visit was very helpful for me because it gave me an introduction to my research question, I found some good articles about the changes that happened in Atlantic Yards in the past. Then, I decided to expand it by doing more research to find some new articles that talk about the future of the same area and all the new changes and projects that the city is planning to do in such a great place like the Atlantic Yards.
