My Success Tips

ENG 1101

01/31/24

Tip 1: Participating is something I barely like to do because I feel like I'm going to stutter a lot. Participating is key because it makes you earn points which is needed, and you get other people's opinions about things. I'll use participating in class by speaking up and volunteering to answer questions. What I used to do not to participate is not raise my hand or not speak because I'm nervous. Sometimes it's never going to be right or going to be wrong.

Tip 2: Finding study skills that work for me. When I study I go to the library and re-do something's that need to be worked on or if I did something and I get feedback I'll try to fix it. It will help me personally by helping me with good memory and also how to speak better because the way I'm speaking is all jumble words and I don't want to do that because people will look at me like "what is he talking about". It will change by me going more to the library and studying and to also listen to music to make me think of more ideas.
