

Project Presentation Instructions

Math 1272 and 1372 – Statistics (with probability)

Present *one* of your statistical projects to the class, using the following guidelines:

- See the class schedule for the designated day(s) for project presentations. Plan to give your presentation in class on the specified date.
- The presentation should be facilitated by PowerPoint slides with appropriate tables, graphs, mathematical symbols, and supporting graphics.
- The presentation should be a maximum of 10 minutes, with 5 minutes for questions and transition.
- Prepare and give the presentation as a team. All team members who are present for the presentation will receive the same grade.

—

- If you cant avoid being absent on the day of the presentation, you must assist in the preparation of your teams presentation and complete an alternate assignment to get credit for the presentation. The alternate assignment is due on same day as presentation (for instructions, please request via email).
- Follow the presentation guidelines on the openlab for the regression project.
- Send your PowerPoint file (and any other files needed for your presentation) to the instructor via e-mail by 11:00 p.m. the day **before** presentations are scheduled.
