

Are you up to the Challenge?

The CUNY Math Challenge

There's Strength in Numbers

Regardless of your major, if you are a matriculated CUNY undergraduate student and enjoy math problems, the CUNY Math Challenge is for you!

\$2,500 Grand Prize

Sponsored by the Office of Academic Affairs and the CUNY Institute for Software Design and Development (CISDD) and supported by the Office of the Chancellor, the CUNY Math Challenge seeks to identify and reward CUNY's best math talent. Students are invited to compete for cash prizes ranging from \$500 up to a grand prize of \$2,500.

How it Works

The first step is to register now to prepare for the first of three online rounds, containing four problems each. A new round opens every three weeks beginning Monday, February 10, 2014. Participants have two weeks to submit their answers in each round, accumulating points along the way. Problems range in difficulty from the "not easy" to "pretty tough." No knowledge of "advanced mathematics" is needed.

Students with the highest total points after the first three rounds will be invited to the final round, an in-person exam to be administered on Sunday, April 27, 2014. Approximately 30 qualifying students will compete in the final round for the cash prizes. Winners will be publicly recognized at an event with Chancellor Emeritus Goldstein and faculty in early May.
