DEPARTMENT:
COURSE:

TITLE:

DESCRIPTION:

TEXTS:

Mathematics
MAT 1375

Precalculus
Topics include an in-depth study of functions such as polynomial functions, radical functions, rational functions, trigonometric functions, exponential and logarithmic functions; connections to vectors and complex numbers; solving trigonometric equations, and identities involving sum, double and half-angle formulas; Binomial Theorem and progressions.

Precalculus
Second Edition
By Thomas Tradler and Holly Carley

CREDITS

## PREREQUISITES:

## 4

MAT 1275 or MAT 1275 CO OR high school mathematics GPA of at least 85 and a successful completion of a high school math course of at least Algebra 2 OR NYS Regents Trigonometry score of at least 70 (or equivalent on Common Core Algebra 2).

Prepared by Professor Thomas Tradler (Spring 2021)
A. Testing Guidelines:

The following exams should be scheduled:

1. A one-hour exam at the end of the First Quarter
2. A one-session exam at the end of the Second Quarter
3. A one-hour exam at the end of the Third Quarter
4. A one-session Final Examination
B. Graphing calculators are required.

## Course Learning Outcomes

| Course Learning Outcomes | General Education Learning Outcomes | Required Core: Mathematical and Quantitative Reasoning |
| :---: | :---: | :---: |
| Be able to graph functions involving polynomial, rational, radical, exponential, or trigonometric functions. Understand the relationship between the formula of a function, the domain and range of a function, the graph of a function, and equations involving a function. | Be able to draw conclusions and related outcomes from formulas and graphs of functions. | Interpret and draw appropriate inferences from quantitative representations, such as formulas, graphs, or tables. |
| Be able to analytically and graphically solve equations involving polynomial, rational, exponential, or trigonometric functions. Be able to identify features of a function such as maxima, minima, or asymptotes to identify features of the original problem. | Be able to analyze a function and its behavior. | Use algebraic, numerical, graphical, or statistical methods to draw accurate conclusions and solve mathematical problems |
| Be able to frame word problems in terms of mathematical equations and/or graphs. Be able to interpret the mathematical solutions in terms of the original language of the problem. | Be able to use existing knowledge or views to phrase an application in terms of a mathematical problem, and be aware of the influence of its context and underlying assumptions. Be able to convert and represent relevant information into various mathematical forms. | Represent quantitative problems expres sed in natural language in a suitable mathematical format. |
| Be able to write solutions of mathematical problems involving polynomial, rational, exponential, or trigonometric functions with full detailed explanations. Be able to represent a mathematical setup using technology. Be able to answer questions concerning mathematical problems involving polynomial, rational, exponential, or trigonometric expressions orally or in written form. | Be able to perform calculations involving functions, and apply this to analyze a mathematical setup, including drawing appropriate conclusions based on quantitative analysis of data. Be able to give explanations of your conclusions, including its evidence. | Effectively communicate qua ntitative analysis or solutions to mathematical problems in written or oral form. |
| Be able to find solutions of equations and be able to identify the behavior of a mathematical setup using graphs of functions. Be able to use technology to find and check expected features. Be able to recognize error in proposed solutions and explain in written or oral form the nature of such an error as well as be able to correct it. | Be able to evaluate the underlying assumptions of an argument. Be able to recognize the limitations and implications of a mathematical setup. | Evaluate solutions to problems for reasonableness using a variety of means, including informed estimation. |
| Be able to use a variety of mathematical representations of functions to express qualitative and quantitative features of a problem. | Be able to select an appropriate model of a given setup and interpret the information presented in mathematical form. | Apply mathematical methods to problems in other fields of study. |

## New York City College of Technology Policy on Academic Integrity

Students and all others who work with information, ideas, texts, images, music, inventions, and other intellectual property owe their audience and sources accuracy and honesty in using, crediting, and citing sources. As a community of intellectual and professional workers, the College recognizes its responsibility for providing instruction in information literacy and academic integrity, offering models of good practice, and responding vigilantly and appropriately to infractions of academic integrity. Accordingly, academic dishonesty is prohibited in The City University of New York and at New York City College of Technology and is punishable by penalties, including failing grades, suspension, and expulsion. The complete text of the College policy on Academic Integrity may be found in the catalog.

## MAT 1375-Precalculus

Textbook: "Precalculus" by Thomas Tradler and Holly Carley, Second Edition, available on www.lulu.com
PDF available from: http://websupport1.citytech.cuny.edu/faculty/ttradler/precalculus.html
WeBWorK: WeBWorK for MAT 1375 uses the OpenLab Q\&A site: https://openlab.citytech.cuny.edu/ol-webwork/
Students will need an OpenLab account in order to post new questions.

| Session | Topic | Homework | WeBWorK Set |
| :---: | :---: | :---: | :---: |
| 1 | 1. The Absolute Value | $\begin{aligned} & \hline \hline 1.1,1.2,1.3(\mathrm{a})-(\mathrm{e}), 1.4(\mathrm{a})-(\mathrm{f}), 1.6, \\ & 1.7(\mathrm{a})-(\mathrm{f}) \end{aligned}$ | Interval Notation Absolute Value Inequalities |
| 2 | 2. Lines and Functions | 2.1 (a)-(c), 2.3 (a)-(c), 2.5-2.8 all | Lines Review <br> Functions - Introduction to Functions |
| 3 | 3. Functions by Formulas and Graphs | $\begin{aligned} & 3.1 \text { (a)-(b), 3.2, } 3.4(\mathrm{a})-(\mathrm{f}), 3.6(\mathrm{a})-(\mathrm{f}), \\ & 3.7 \text { (a)-(g) and (m)-(t), 3.8, 3.9 } \end{aligned}$ | $\begin{aligned} & \text { Functions - Difference Quotient } \\ & \text { Functions - Function Notation } \\ & \text { Functions - Piecewise } \end{aligned}$ |
| 4 | 4. Introduction to the TI-84 | 4.1, 4.2 (a), 4.3 (c)-(i), 4.6 | Graphing Calculator |
| 5 | 5. Basic Functions and Transformations | 5.1, 5.2 (a)-(f), 5.3 (a)-(d), 5.5 (a)-(e) | Functions - Symmetries <br> Functions - Translations |
| 6 | 6. Operations on Functions | $\begin{aligned} & 6.1 \text { (a)-(c), } 6.2 \text { (a)-(b), } 6.3 \text { (a)-(d), } \\ & 6.4 \text { (a)-(c), } 6.5 \text { (a)-(b), } 6.6,6.7 \end{aligned}$ | Functions - Operations |
| 7 | 7. The Inverse of a Function | $\begin{aligned} & 7.1 \text { (a)-(c), } 7.2 \text { (a)-(f) and (l)-(p), } \\ & 7.3 \text { (a)-(c), } 7.4 \text { (a)-(c), } 7.5 \text { (a) and (d) } \end{aligned}$ | Functions - Inverse Functions |
| 8 | First Examination |  |  |
| 9 | 8. Dividing Polynomials <br> (8.3 Synthetic Division is optional) | $\begin{aligned} & 8.1 \text { (a)-(c) and (j)-(k), } 8.2,8.3,8.4(\mathrm{a})-(\mathrm{d}) \\ & \text { (optional: } 8.5(\mathrm{a})-(\mathrm{d})) \end{aligned}$ | Polynomials - Division |
| 10 | 9. Graphing Polynomials <br> (9.3 Graphing Polynomials by Hand is optional) | $\begin{aligned} & \text { 9.1-9.3 all, } 9.4 \text { (a)-(c), } 9.5 \text { (a)-(c) } \\ & \text { (optional: } 9.6 \text { ) } \end{aligned}$ | Polynomials - Graphs |
| 11 | 10. Roots of Polynomials (10.1 Rational Root Theorem is optional) | $\begin{aligned} & 10.2 \text { (a)-(d), } 10.3 \text { (a)-(c), } 10.4 \text { (a)-(c) and } \\ & \text { (f)-(h), } 10.5 \text { (a)-(c) and (f)-(i) } \\ & \text { (optional: 10.1) } \end{aligned}$ | Polynomials - Rational Roots Polynomials - Theory |
| 12 | 11. Rational Functions <br> (11.2 Graphing Rational Functions by Hand is optional) | 11.1-11.4 all | Rational Functions - Domains Rational Functions - Asymptotes Rational Functions - Intercepts Rational Functions - Comprehensive |
| 13 | 12. Polynomial and Rational Inequalities | 12.1 (a)-(c), 12.2 (g)-(j), 12.4 (a)-(f), 12.5 | Polynomials - Inequalities Rational Functions - Inequalities |
| 14 | 13. Exponential and Logarithmic Functions | $\begin{aligned} & 13.1 \text { (a)-(f), } 13.2 \text { (a)-(e), } 13.4,13.5 \text { (a)-(b), } \\ & 13.6 \text { (a)-(h) } \end{aligned}$ | Exponential Functions - Graphs Logarithmic Functions - Graphs |

| Session | Topic | Homework | WeBWorK Set |
| :---: | :---: | :---: | :---: |
| 15 | Midterm Examination |  |  |
| 16 | 14. Properties of Exp and Log | $\begin{aligned} & 14.1 \text { (a)-(e), } 14.2 \text { (a)-(f), } 14.3 \text { (a)-(c) and (e), } \\ & 14.4 \text { (e)-(g), } 14.5 \text { (a)-(e) } \end{aligned}$ | Logarithmic Functions - Properties <br> Exponential Functions - Equations <br> Logarithmic Functions - Equations |
| 17 | 15. Applications of Exp and Log | 15.1 (a)-(b), 15.3-15.8 all | Exponential Functions - Growth and Decay |
| 18 | 16. Half-life and Compound Interest | 16.1-16.7 all, 16.9 (a)-(c), 16.10 (a)-(e) |  |
| 19 | 17. Trigonometric Functions | $\begin{aligned} & 17.1(\mathrm{a})-(\mathrm{d}) \text { and }(\mathrm{g})-(\mathrm{h}), 17.3,17.4, \\ & 17.5(\mathrm{a})-(\mathrm{d}), 17.6(\mathrm{a})-(\mathrm{g}) \end{aligned}$ | Trigonometry - Unit Circle <br> Trigonometry - Graphing Amplitude <br> Trigonometry - Graphing Period <br> Trigonometry - Graphing Phase Shift <br> Trigonometry - Graphing <br> Comprehensive |
| 20 | 18. Addition of Angles and Multiple Angle Formulas | $\begin{aligned} & 18.1 \text { (a)-(e), } 18.2 \text { (a)-(b), } 18.3 \text { (a)-(d), } \\ & 18.4 \text { (a)-(d) } \end{aligned}$ | Trigonometry - Sum and Difference Formulas <br> Trigonometry - Double and Half Angle Formulas |
| 21 | 19. Inverse Trigonometric Functions | 19.1, 19.2 (a)-(j), 19.3 (a)-(c) and (g)-(i) | Trigonometry - Inverse Functions |
| 22 | 20. Trigonometric Equations | $\begin{aligned} & 20.1 \text { (a)-(d), } 20.2 \text { (a)-(c), } 20.4 \text { (a)-(k), } \\ & 20.5 \text { (a) } \end{aligned}$ | Trigonometry - Equations |
| 23 | Third Examination |  |  |
| 24 | 21. Complex Numbers | $\begin{aligned} & 21.1 \text { (a)-(c), } 21.2 \text { (b)-(e), } 21.3 \text { (a)-(c), } \\ & 21.4 \text { (a)-(d), } 21.5 \text { (c)-(d), } 21.6 \text { (a)-(d), } \\ & 21.7 \text { (a)-(d) } \end{aligned}$ | Complex Numbers - Operations <br> Complex Numbers - Magnitude <br> Complex Numbers - Direction <br> Complex Numbers - Polar Form |
| 25 | 22. Vectors in the Plane | $\begin{aligned} & 22.1 \text { (a) and (d), } 22.2 \text { (a)-(d), } 22.3 \text { (b)-(f) } \\ & \text { and (k)-(m), } 22.4 \text { (a)-(b) } \end{aligned}$ | $\begin{aligned} & \text { Vectors - Magnitude and Direction } \\ & \text { Vectors - Operations } \\ & \text { Vectors - Unit Vectors } \end{aligned}$ |
| 26 | 23. Sequences and Series | $\begin{aligned} & 23.1 \text { (a)-(c), } 23.3 \text { (a)-(d), } 23.4 \text { (a)-(d), } \\ & 23.5 \text { (a)-(b), } 23.7 \text { (a)-(b) and (e)-(i) } \end{aligned}$ | Sequences - Intro Series - Intro Sequences - Arithmetic Series - Finite Arithmetic |
| 27 | 24. The Geometric Series | $\begin{aligned} & 24.1 \text { (a)-(d), } 24.2 \text { (a)-(c), } 24.3 \text { (a)-(b) } \\ & \text { and (e)-(i), } 24.4 \text { (c) and (f)-(i), } 24.5 \text { (a) } \end{aligned}$ | Sequences - Geometric <br> Series - Geometric |
| 28 | 25. The Binomial Theorem | $\begin{aligned} & 25.1 \text { (a) and (i)-(l), } 25.2 \text { (b), } 25.3 \text { (a)-(d), } \\ & 25.4 \text { (a)-(d), } 25.5 \text { (a)-(d), } 25.6 \text { (a)-(d) } \end{aligned}$ | Sequences - Binomial Theorem |
| 29 | Review | Final Exam Review Problems |  |
| 30 | Final Exam |  |  |
