J_Allied_Health,_author_proof_Fall_2020_issue.zip;

Good afternoon Provost Brown and Dean Smith,

I hope this finds you both well and enjoying this beautiful day. Pardon the weekend email, however I just received the forwarded email from a manuscript that I been attempting to publish for the past few years.

This article stems from the original that Prof. Susan Kupsch spear-headed from our DEN 1200 course. I was successful in obtaining an IRB last year and revised the manuscript to be broader in a general journal writing sense, and only used one set of data from the three sets (class sections) in the original paper.

Unfortunately, due to the small nature of these results, several dental publications have declined the manuscript. I received the predatory document from Provost August and upon receiving all the paperwork from the publisher, was hesitant.

I have been in contact with Monica who has provided much guidance and assistance to determine the efficacy of this publication. Here is her comments:

"The Journal of Allied Health is the official publication of the Association of Schools Advancing Health Professions, a non-profit scholarly society based in Washington, D.C. that supports allied health education. This is a traditional, non-open access society journal that uses page charges as an integral means of income in addition to subscription fees to libraries. Some society publishers in the sciences continue to employ the page charge model for income. These charges are not article processing charges (APCs).

The journal pays to have its content hosted on IngentaConnect, a high profile international journal portal that is owned by Taylor & Francis, one of the big five commercial scholarly publishers. They also continue to print and mail the journal to subscribers. This is a small publisher. The journal lacks an impact factor but it is indexed in Scopus, another important positive indicator of quality. There is absolutely no evidence that this publisher is involved in any exploitative, deceitful, or deceptive practices."

I would love to see this published as I put much time and work into it and hope you agree.

I welcome your input and support.

Best,
Susan

Subject: RE: JAH-2020-02259R Decision Letter

Unfortunately, a decision was made to deny providing a waiver. Although some authors may obtain support from their respective institutions, most of the work published in our journal does not have extramural funding. Advertising revenue is non-existent and subscription revenue does not come close to offsetting personnel costs; expenses associated with printing and mailing; and having outside vendors manage our publication electronically and placing each issue on the Internet.

Dear Editor,

I have not heard back from you to-date with my email sent on Wednesday (6/24) and on this email trail.

Additionally, I am writing to request a waiver of page charges for my accepted article entitled "Improving Dental Hygiene Students' Journal Writing."

My research is not grant funded and my employer, New York City College of Technology, City University of New York, does not have any subvention funding or other monies supporting faculty publishing expenses.

I would like to request a waiver of the page charges for my article which I would have to pay entirely out of pocket.

Thank you in advance for considering my request.

Dear Prof. Davide:

I am pleased to inform you that your manuscript entitled, "Improving Dental Hygiene Students' Journal Writing," has been accepted for publication in the Journal of Allied Health.

Because of the number of articles awaiting publication, we do not have a definite publication date as yet. Once the decision is made, we will notify you.

We believe your paper makes a contribution to the field and will be of interest to the Journal's readers. Along with you, we look forward to seeing it published.

Sincerely,

Thomas Elwood, Dr.P.H.
Editor
