

**NEW YORK CITY
COLLEGE OF
TECHNOLOGY**

The Center of Medical Devices and Additive Manufacturing in the Department of Mechanical Engineering Technology at City Tech introduces:

LifeSci NYC Internship Program

Date: Thursday, 12/2/2021

Time: 12:15 - 1:00 pm

Presenters: Sharon Kaplan , Program Director
Arli Cornejal, Program Coordinator
Sally Feng, Program Coordinator

About the Seminar:

"The LifeSci NYC Internship Program is a dynamic NYC initiative to build a rich pipeline of diverse talent to fill the needs of the fast-growing life-sciences industry. Launched in 2017, the program has provided paid internships for over 425 students at over 120 life sciences and healthcare employers throughout NYC. Students from all majors are urged to apply! While we place many biology, chemistry, and other science students, we also offer opportunities for management, marketing, business, economics, computer science, communications students, and more. Life sciences and health are one of the top industries among NYC's fastest-growing companies, and gaining real-life experience in this industry can help launch a career. The program is open to undergraduates and graduate students attending a university in New York City, and to New York City residents who attend(ed) a university anywhere. Those who graduated in spring 2020 or later are also eligible to apply. The Info Session will provide details about the program and application process, as well as specific guidance on how to create a strong application, resume, and cover letters. It will conclude with an opportunity for Q&A."
