

ASME Engineering Education Professional Workshop Series

Resume & Interviewing Workshop

Come hear from corporate volunteers on how to build your resume and how to prepare for an interview. During this virtual workshop you will learn:

- tips for building your resume
- why key words are important
- how to customize your resume
- how to prepare for an interview, and
- interviewing tips

You will even have the opportunity to talk with the volunteers in small groups and get additional feedback on your resume.

Tuesday **April 19** **5:30pm - 7pm**

Thursday **April 21** **12:30pm - 2pm**

CAD Overview Workshop

During this 1.5 hour virtual workshop, an experienced CAD professional will lead a virtual discussion on the many ways CAD is used by engineers and designers alike. You will learn how the software is used:

- to increase the productivity of the designer
- to improve the quality of the design, and
- to convey material, process, dimension, & tolerance information

You will even get a sneak peek at the software and some of its features and learn about training options to earn your CAD certification.

Tuesday **April 26** **5:30pm - 7pm**
