

Melisa Kucevic

Trilogy Proposal

During my time at City Tech I have learned many skills, one including management which I have come to love and want to pursue as a career. My goal once I graduate from City Tech is to become a stage manager/production manager for concerts, shows, and live events. I would like to put my skills to the test and produce a concert at City Tech Voorhees' Theatre. Having an event like this would help me build my budgeting skills, papertrail skills, time management skills, organization and give me experience with working with concerts.

For the fall semester of 2019 I would like to present Trilogy. It includes Nick Mallios, a student in the ENT department, his friends Joe, Josh, and Adriano and his brother Luke. The group is a rock band that does covers in both electric and acoustics while also doing some original songs as well. What better way to show the group's amazing talent than to do a concert. Putting together an event like this would help me put my skills to the test and learn more with the experience.

Project Deliverables:

- Budget Estimate
- Event Schedule
- Rehearsal Schedule
- Setlist
- Equipment List
- Venue Analysis
- Contact Sheet
