Elevator Pitch
11/16/18

Setting: At an architectural networking event approaching someone in the profession

Hi, my name is Saadiq Alli, nice to meet you. I'm currently in my final semester at City Tech studying Architectural Technology. The program is great because it provides us with a great understanding of both the technical and conceptual aspects of architecture. When I'm not in school I work part time at Robert Phillip Ferraro Architect P.C. It's a small office located on Long Island. The firm is great because it allows me to work on many projects throughout the week and experience all types of work. I also get many opportunities to work on full projects on my own. When I'm not working on projects, I'm on the phone with clients, lawyers, contractors and other professionals assisting them throughout the process. If I'm not working on something architecture related, I'm usually doing something artistic. Whether its drawing or painting, immersing myself in the artistic world is important to me.
