Introduction to Video

Thursday 6/24/2021

Agenda

- ❖ Reminder about Vlog Post 2
- ❖ Definitions
- ❖ Relinking Content in Premiere Pro
- ❖ Editing Green Screen
- ❖ Adding Audio to the Timeline
- ❖ Flipping the Video

Vlog Post 2 Due Sunday

Editing Assignment Due
Sunday

Definitions

- ❖ Freeze Frame: The repetition of a single frame of footage to give you the effect that the action has stopped or that the audience is looking at a still image.
- ❖ Slow Motion: A form of animation in which static objects are physically animated and photographed frame by frame.
- ❖ TimeLapse: A cinematography technique where the camera is set to capture one frame at a time with a relatively large interval between captures. When played back at normal speed, the event appears to be occurring much faster than it would in real life. This is useful for long-lasting events such as flowers growing or clouds moving across the sky.
- ❖ Voice Over: Voice added to video during editing. In most cases, the person whose voice is used is not on camera, or if they are, it is meant to be an interior voice or thought.
