02. Adobe Illustrator Interface
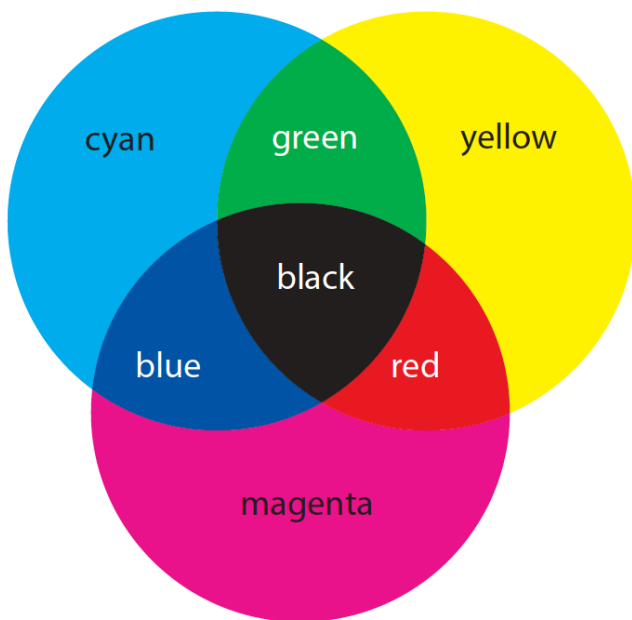

Document Set-up in Adobe Illustrator

Welcome Screen – If you don't see it, go to the Help on The Menu and launch it.

The left side indicates items that have been recently opened. Just click on its name or go down to Open and navigate to where the document is.

The right side is used to create a new document.

Types of documents – The basic difference is the choice of color models.
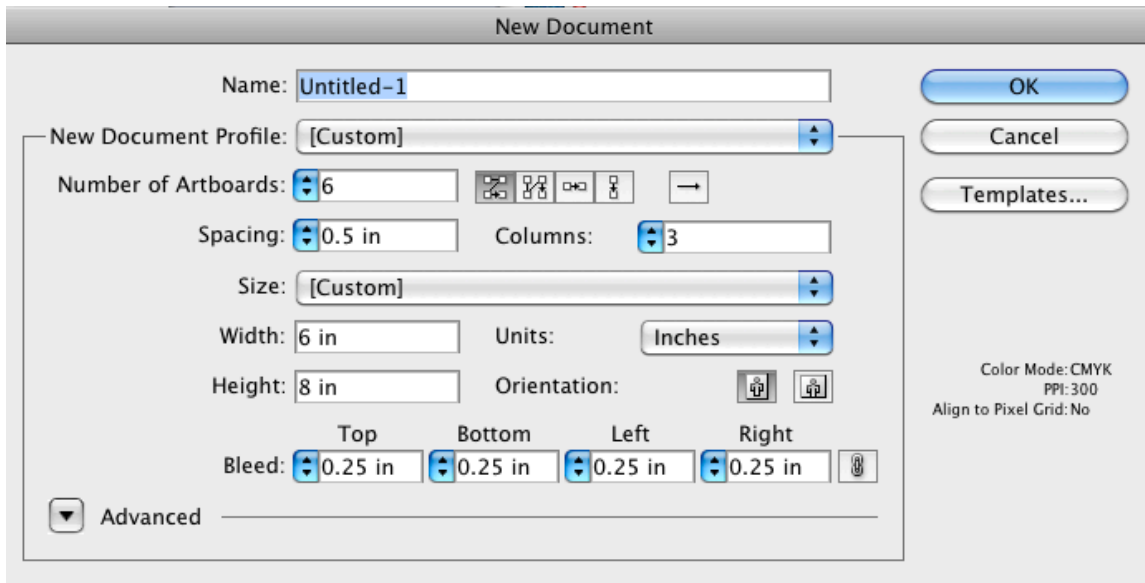

CMYK Color Model

RGB – WEB or monitor color model

RGB Color Model

Starting a new document

There are several ways to create a new file in Adobe Illustrator

1. From the Welcome Screen
2. From the File Menu
3. By using the Keyboard Shortcut Command N

Choices for your file
Name
New Document Profile
Number of Artboards (and viewing them)
Spacing between artboards
Columns
Size – width, height and units
Orientation
Bleed – Advanced
