Research Project Team:***Nargiza Rahmatilloeva, Project Director***

Nargiza is a 20 years old student at New York City College of Technology majoring in Business & Technology of Fashion. She's currently pursuing Bachelors Degree and planning to graduate by the end of this year. She is interested in fashion design and is involved in business, therefore she is now about to become a designer and create her own clothing line and in the future she will make it a major clothing business. As a project director, her responsibility is to solve the math and make sure the research project is overall good and completed. She always makes sure that her work is completed on time. She has plans and dreams that she wants to become true. So she tries her best so that she fulfills her plans. When it comes to group work, she always likes to be the one to plan things out and work on all the parts of the project as a group collaborating with each other rather than just splitting the project and working on it individually without collaboration with each other. She also likes to help her group members to finish the project earlier before the deadline so there will be a time to go over it.

Shaimelys Marcano, Research analyst/Designer/Product developer

Shaimelys Marcano aspires to be a VP or COP in product development. She is currently working for a small private company that develops children's apparel to wholesale to large corporations. She works closely with Design, Product development, Production and Sales. Acquiring knowledge and overall experience is what is most important to her. She hopes to someday create her own company. As the research analyst she was responsible for conducting the research on the product as well as the consumer of the product and drawing conclusions from the findings. As a designer, she was responsible for developing 4 new prints for 8 new styles to be sold by ***Compression Fashion 4 Kids***. She was also responsible for designing the store layout. She sourced the materials that will be incorporated into the new product line. During this project one of the most important takeaways was how crucial communication is amongst any group of people you work with. When working as a team everyone needs to be on the same page, and if not then it must be addressed as a group. Building healthy relationships with your co-workers is important in order to have a productive environment. Timing was also a very important takeaway from this experience. I learned to manage my time wisely by making quick yet precise decisions.

Amber Ramos, Creative director

Amber is a junior at the New York City College of Technology. She has graduated with an associates in business of fashion but she is currently working on her bachelor's degree. She aspires to be a fashion stylist at a magazine when she graduates in spring 2022. The role that Amber presents in this project is to create 4 of the styles and 8 designs that the group decided to do, another role she has is to create fabric swatches that will be used for the compression vest and hoodies. While working as a

team everyone should have good communication and understanding of what each person is contributing in the project. There should be no miscommunication; everyone should be on the same page. A take away from this project was to work as a team and create a decent time management to get the project done and perfect. While working as a team it will show people that you have communication skills and you are able to manage your time well when it comes to group projects.

Abstract

According to the CDC (Centers for Disease control and prevention) 1 in 54 children have been identified with Autism spectrum disorder, and about 1.6 million children have been diagnosed with ADHD. We at Compression Fashion 4 Kids have launched a new product line that features compression Hoodies as well as Vests that have the ability to be transformed into huggable plush. In this collection we have handpicked the materials as well as the trims based on our consumers special needs. We wanted to show our customers that we care about families and children within the censoring processing disorder community. We wanted to give these families a sense of comfort and calmness through our products. We have added a twist on the standardized compression vest and hoodies. We have made them fashionable.

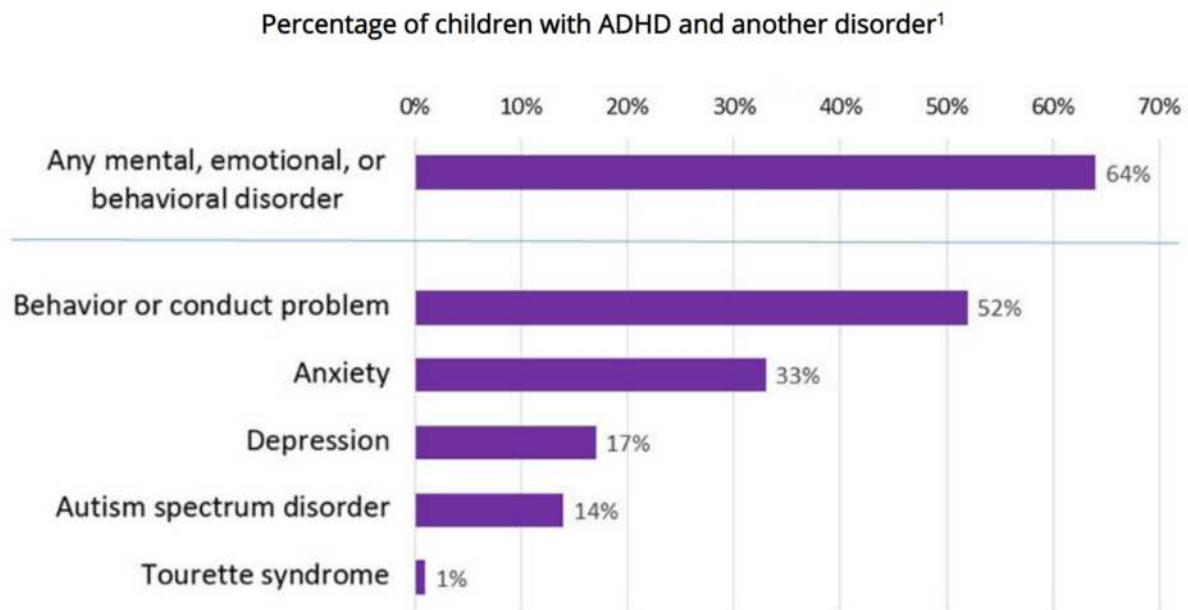

Figure 1. Percentage of Children with ADHD and another disorder.2020

Company Information:

Compression fashion 4 kids is a company that sells and buys childrenswear apparel. Our retail store is located in Atlantic City, New Jersey. Compression Fashion 4 kids is also available online at **CompressionFashion4Kids.com**. Our company focuses on developing compression clothing for children between the ages of 2-12 years old. We develop seamless compression garments for children that have censoring processing disorders such as but not limited to; Autism, ADHD, Hypotonia, OCD, and anxiety. Recently we have developed a new product line that consists of compression hoodies and vests.

These hoodies and vest are not like the basic products we have available in store. Unlike the regular compression hoodies and vest we currently produce, these new products have the ability to turn into a plushie (stuffed animal and/or objects). This new product line is packed with vibrant and fun prints that children will love. Many which are on trend with the upcoming Spring/ Summer 2022 season. We have developed 8 new prints. Four of the prints will be for the boys styles while the other four prints will be for the girls styles. For the boys spring season we have developed two new prints such as the Dinosaur and Tiger. These two prints have corresponding plushies that the hoodie and vest can be transformed into. For The boys summer season we develop a shark and Surf print that also have corresponding plushies. For the girls spring samples we created an adorable cat and unicorn print that turns into a cat and unicorn plushie. For the summer samples we created a rainbow and flower prints that will turn into a flower and rainbow plushie. We have developed the hoodies for the spring season and the vest for the summer season. The concept behind this idea is that children will be able to wear these compression hoodies and vest during the day to give them a sense of comfort and support. When

they decide they want to take off their hoodie/ vest, they can turn it into an adorable plushie that they can hug and play with. While the hoodies/vests are in use the plushie is hidden away in a secret pocket on the hood. When the child is ready to play they can unzip the hidden pocket and turn their hoodie/ vest into the plushie.

Our biggest competitors are *Kozie Clothes*, *Smart Knit Kids* and *Fun and Function*. Kozie clothes, Smart knit kids and Fun and Function are childrenswear companies that produce therapeutic clothing and products for children with sensory needs. They have a wide range of clothing that is specifically engineered to provide comfort for children suffering from sensory disorders. They are our biggest competitors because they develop similar products to our product line. What sets us apart from them is that unlike these other brands we develop compression clothing with fun vibrant prints for children. We offer a larger spectrum of color palettes. Many of our competitors offer compression clothing that is used as an undergarment rather than clothes they can openly wear. Often this clothing is hidden under what they wear. Recently we have also launched our new product line of compression hoodies/vest that transform into plushies. This has not been done by any of our competitors. We also offer high quality and satisfactory products for an exceptional price. With our new product line these clothes will no longer be just an undergarment, but instead everyday stylish clothing.

Compression Convertible Hoodies & Vests

Our Products:

Our products are made from a Nylon/ Spandex fabric that is normally used in swimwear and activewear. This fabric is extremely stretchy, and has better moisture-wicking and breathability than cotton, which is normally used in the industry. This fabric is perfect to use for clothing for almost all geographic regions because it is extremely light and comfortable. It can be used in areas with extremely hot climates as well as areas with much cooler climates. It can serve many purposes but its main quality is its ability to be used as a form of compression in apparel. The Nylon spandex fabric provides a deep squeeze that fits snugly against the wearer's torso. This helps the wearer feel as though they are being hugged tightly because of how tight-fitting the

compression clothing is. We have also decided to use plastic zippers for the hoodies and vest to help facilitate the removal of the garment process for the children. We have decided to use 10mm zippers which are much bigger than the average children's zippers (5mm). The products we offer in store are compression Tees, Tanks, vests, hoodies, shorts, skorts, and socks. Our Basic stock list consists of T-shirts, Tanks, Shorts, Skorts, and socks. Our Fashion goods are the new collection of Hoodies and Vest we have developed specifically for the spring and summer seasons. Most of the items in our Basic stock list are unisex. We offer these items in various colors. The Hoodies will be sold for \$40 and the vest will be sold for \$30.

Children with special needs go through a lot of emotions, and have difficulties when it comes to socializing and interacting with others, especially in school. The compression vest and hoodie will make them feel like they're in a safe space where they can be themselves. It will help the child become more aware and focused on the task at hand instead of being distracted by what they are wearing. Once the hoodie/vest is reversed, it becomes a stuffed animal they can hug, squeeze and play with it. Our compression vests and hoodies provide proprioceptive feedback that promote self-calming, focus, balance and increased body awareness. This product is affordable and useful for the family as well as the child. The fabrics used to make this product are soft and most definitely comfortable. We wanted to make a product with fun prints and colors because we wanted to grab the attention of the child and help them feel confident and safe wearing our products.

Target Market:

Our target customer would be a parent or family member with a young child with censoring processing disorder. They are seeking to find clothing that their child will feel comfortable wearing. Children with censoring processing disorders have difficulties when it comes to clothing due to the exposed clothing tags, itchy fabrics, and exposure to the elastic or buttons. For many parents it is extremely difficult to get their children dressed quickly in the morning due to these issues that they may encounter. A child can become extremely upset based on the materials that the clothing is made from. Many things can become distracting and irritating. Unfortunately the majority of the Childrenswear industry does not cater to children with special needs. Our clothing will not only help children have a sense of calmness and reduce anxiety but it will also help parents that have a more active lifestyle and are openly seeking clothing

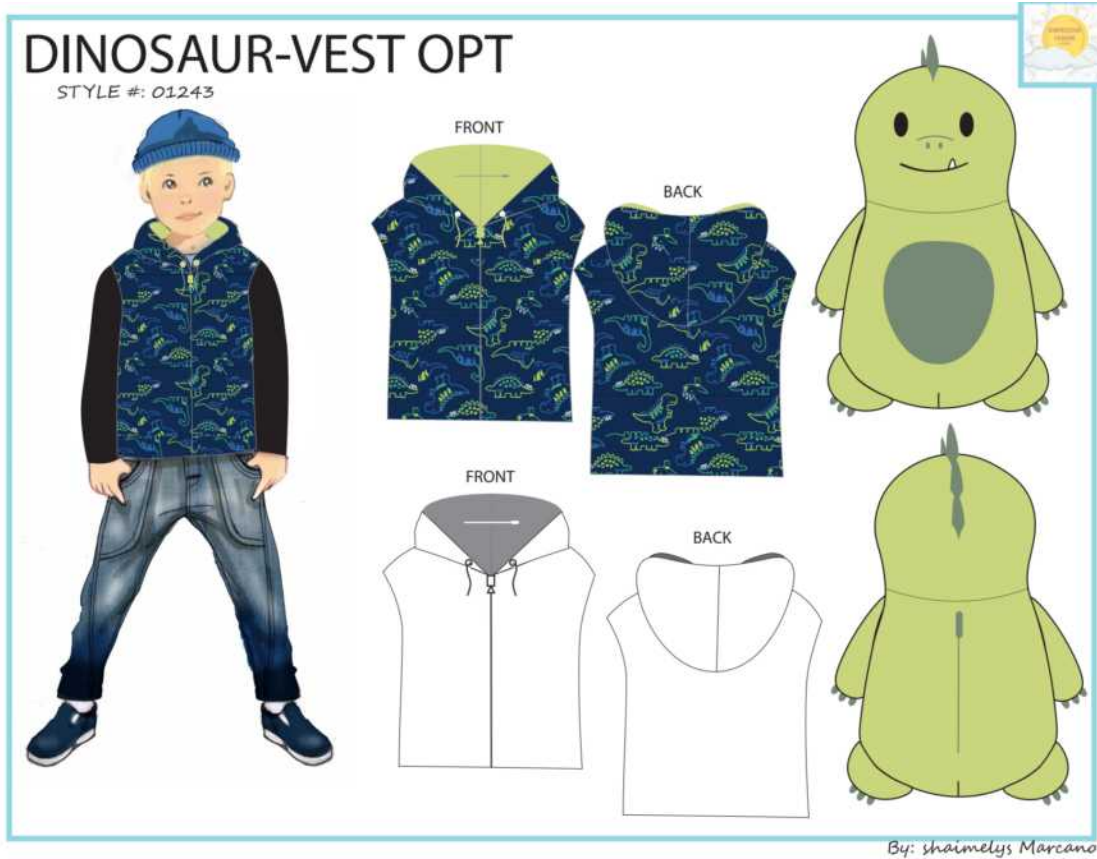

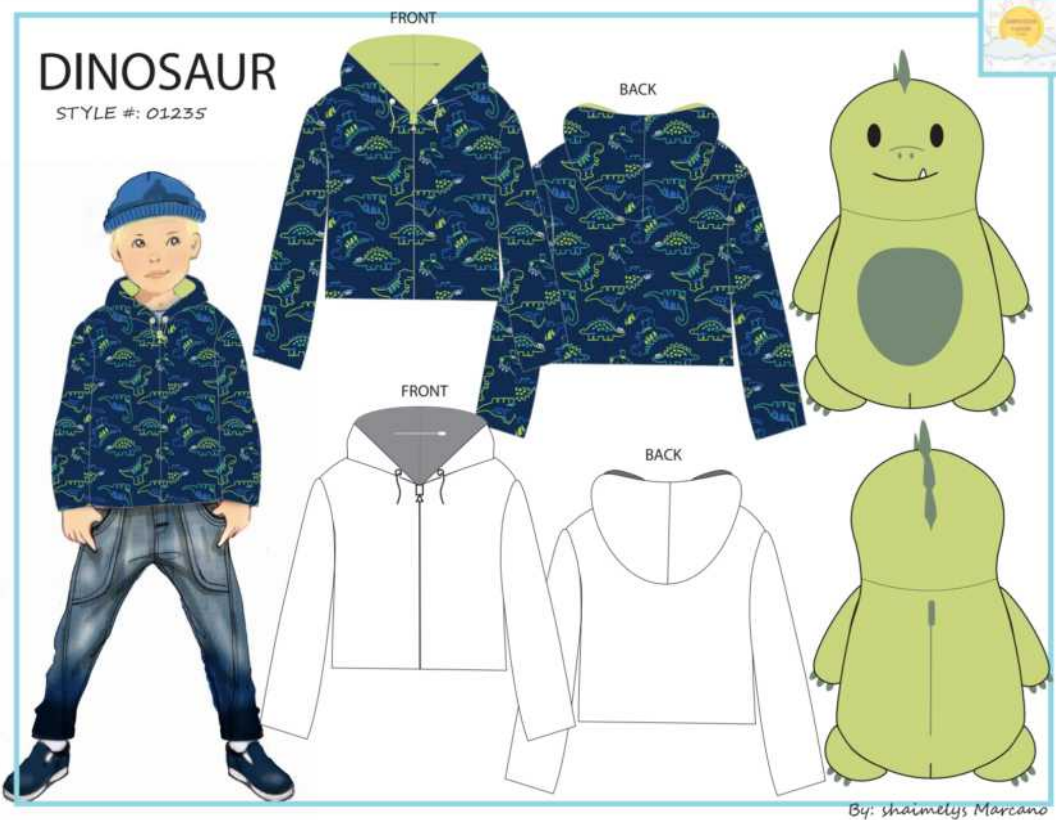

companies that cater to their child's special needs. Our products are aimed at people in the middle class.

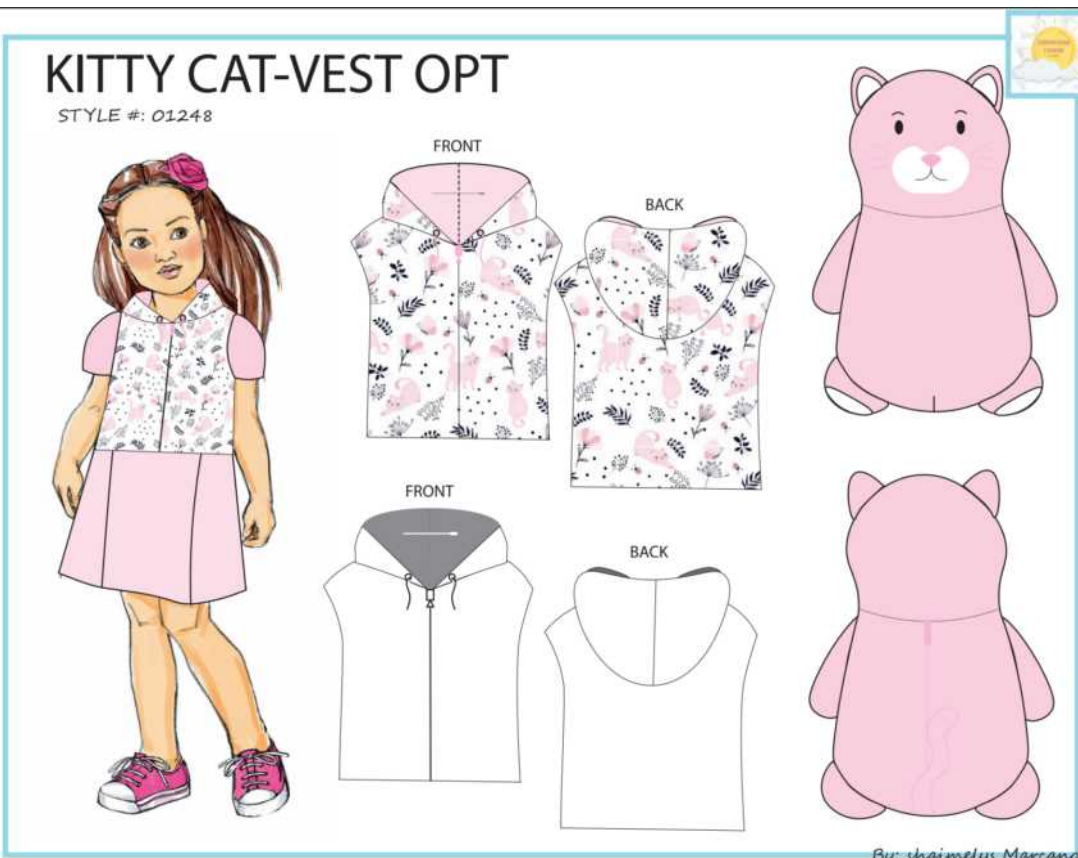

VALS:

Our consumers, as per VALS framework can be considered to be **Thinkers**. They are considered thinkers because these consumers are mature people who value order and knowledge in rational decision making (Merchandise Management articles, 2020). These consumers tend to be more informed about the products they are consuming. As discussed previously, our consumers tend to be parents and family members with children with Autism, ADHD, Hypotonia, OCD, and anxiety. Their lifestyles often are built around their child's special needs. They want what is best for their child, therefore they seek out brands, products, and services that will help to facilitate their everyday lives. These people are very well educated in their child's mental, physical, and social abilities. Because of all the things they take into consideration in decision making, they tend to be more open about trying new products. They love the opportunities to extend their knowledge. Our consumers want a safe and easy way to keep their child comfortable without having them go through so many emotions. Very often the child's days can be ruined by the slightest irregularity in their clothes. This makes it extremely difficult for the parent and/or family members when they have a daily routine or have to run errands. With the help of our products the child will feel comfortable and calm.

Store Layout:

For the interior design of our retail store we will have different shades of calming blue tones painted on the walls. In recent studies it was found that shades of soft blue colors have a calming effect on children. At our retail store we want to create a calming yet welcoming environment for our customers. We will also be color coordinating all the merchandise inside the store to give the customer a sense of satisfaction when they walk in and see how everything is well organized by color and size. The clothing will be hanging on the walls of the store leaving an open space in the center of the store for tables that will display our new products.

Conclusion:

Here at compression fashion 4 kids we make it our top priority to provide families of children with sensory processing disorders with the resources they need to excel in their everyday lives. Our mission is to create products that are not only affordable but also able to serve its purpose, which is to provide comfort and safety for children..

 - Employee Discount= $\$250,000 \times 7\% = \$17,000$
 - Markdown= $\$25,000$
 - Shortages= $\$250,000 \times 3\% = \$7,500$
- Planned EOM stock= **\$70,000**
- Total monthly needs= $\$70,000 + \$50,000 + \$250,000 = \mathbf{\$370,000}$
 - EOM: $\$70,000$
 - Planned reduction: $\$50,000$
 - Planned sales: $\$250,000$
- BOM Stock= **\$210,000**
- Planned Purchases= $\$370,000 - 210,000 = \mathbf{\$160,000}$
 - Total monthly needs = $\$370,000$
 - BOM stocks= $\$210,000$
- Merchandise on order= **\$24,000**
- Open to Buy= $\$160,000 - \$24,000 = \mathbf{\$136,000}$
 - Planned purchases
 - Merchandise on order

B2: Average monthly Sales is \$275,000.

$$\$1,650,000 / 6 \text{ months} = \$275,000$$

B3: Average monthly on order is \$86,666.67

$$\$514,000 / 6 \text{ months} = \$86,666.67$$

B4: Markdown % for march is 10%.

$$\$25,000 / \$250,000 \times 100\% = 10\%$$

C1: Sales Plan for the next season is \$102,300.

Total planned sales=\$300,000+\$200,000+\$300,000+\$200,000+\$400,000+\$250,000= \$1,650,000
 Sales plan for next season=\$1,650,000x 6.2%=\$102,300

C2:

\$1,820,000-C1= \$1,820,000-\$102,300=\$1,717,700

\$1,717,700/\$1,820,000x 100%=94.34%
