Unit 3 Assignment Process Essay

Word Count: 593

Our Unit 3 Repurposing Assignment was not easy for me. Still, initially, it became more natural to me once I knew what I wanted to say everything started to come to me. This assignment was new for me; I never did something like this before. Making a website on the right side was everything different to me and kind of cool made me think outside the box for certain things, At first, I didn't know how I wanted my website to look so I just did anything and already knew I wanted to do my first assignment because it was something I know everything about.

In the beginning, I really didn't know much effort into making my website honestly I just joked around. I wrote anything to get my assignment in on time. I had a lot planned out for this website. I made sure I did it every slide colorful and fun, with a lot of the information, great appearance, and everything overall since this website was about the job I wanted each slide to mainly to focus on my kids and the whole purpose of my career; how we have a great connection with the kids, and different things that go on in my program but when I first did it none of that came to my mind.

The first time my website was made, it was all about the kids. It was colorful; it just wasn't informational. It didn't look neat. It looked like it was all over the place. After the second peer review, I was like okay I really need to think about how I want my website and what each slide needs to consist of and what needs to be in each slide and how the set up is going to be once I did

that it was over. The feedback from the peer review gave me more confidence to do better with my website both reports told me I needed to add videos and have a home page so I did that and everything started to become more natural for me because I knew what needed to be in each slide when I was making the website out of nowhere I found the motivation to make my website cleaner.

As I worked on my website, I literally had to alter everything I did because what I had was not working for me, so the format was changed, and the information for each slide, I'm glad I got a chance to update my website and make it 10x better because I don't know what I would've done if I didn't get to it took me a long time to actually get started on my website about a couple of days. Hence, the first thing I did was think of how I wanted my new website to look, so I came up with a color, picture pattern. Hence, I started off with a color then the next slide was a picture also made sure to make the colors I choose bright because the topic is afterschool and kids they like exciting things.

When creating this project, I noticed that I mind my mind a lot but that's alright because being determined is better than doing something and not put anything into it, this project really made think about stuff; if I really put my mind to it I can get it done and add some much creativity into my work, but I'm happy I got to put my personality into a website and show people the real me.
