# Chinese Virus?

The begining

The outbreak of Covid-19 started in 2019 in Wuhan China. Which led to for it to spread throughout the world. Since the outbreak started from Wuhan, it caused some people to despise and accuse Asians of causing Covid. Which has nothing to do with them.

FIGHT THE VIRUS. FIGHT THE BIAS.

I love has no labels

HATE IS A VIRUS

Influence

The hatred of Asian Americans increased and became more accepted under the influence of the previous president, Donald Trump, who was in charge of the time when covid started and all this hate against asian americans was taking place . By asserting that Asians should be blamed for Covid, Trump furthered the prejudice. The president used the term "chinese virus," and "Kung Flu" which is absurd and plainly derogatory. In his capacity as president, he is tasked with protecting his citizens, but it appears that he performs the opposite.

Undertsanding and helping

Asians are not to blame for covid because they did not cause it and it just so happened to have an outbreak in China. A pandemic was expected because there has always been a pandemic every century. Beginning with the Spanish Flu in 1920, 1820 Cholera, and 1720 Plague. More importantly, we must ensure that Asian Americans once again experience a sense of security. Even though there have been physical assaults and even some murders, no significant steps have yet been done to address this impediment. However, as violence increased and hatred spread, nearby residents began to patrol the area while wearing an orange vest in an effort to protect others and stop all hate crimes committed against them. In addition, there have been demonstrations and sales of awareness-raising goods. The most crucial thing to remember is to report if you see hate towards any Asians. Inform the police and offer any assistance you can.
