

# Your Public Safety is in harm

## Want to know why?

### What is Gun violence to you

Is it an issue where at surface level there are shootings but the deeper you look into it it will be gun laws and licensed gun industries.

#### Accessibility to guns

The rate of production that licensed gun manufacturers had produced from 2009 was 255% and is still increasing.(Does this concern you)

### Do We Citizens And Immigrants Have Safety?

Laws that congress has passed affected the procedures of having a license that allows the owner of a firearm to carry it on themselves in the public by making the process faster and easily obtainable(You could legally obtain a weapon at 16-up).

1. Shootings Are going to an all time high.
2. Licensed gun factories don't take accountability for mass production.
3. Congress wants to keep laws old fashioned by making public safety worse

## Detailed Plans We Need!

Governor Kathy Hochul talked about how there was a problem about gun violence and that this issue had been on the rise. So there had been restrictions placed on people who want to own a

firearm there were background checkups, mental health awareness, and many more types of restrictions about how to keep firearms away from teenagers so the new age limit is 28 i believe. These new laws are more about restricting the accessibility teens have but it will become an issue on how much force will police use for instances where firearms are involved.
