

Unit 3 project final reflection

The gender that i chose for my third project was an infographic presentation, and why I had chosen this gender for my project because I like always doing presentations for anything in particular and showing like graphs and explaining anything that is in my presentations and why this choice that I made relates to the people of my age or a little older is like for example when people want to show an increased of a product or something revolutionary around the world, the best way to show that is by making infographic presentation because that is the best way to show for example statistics and other staff that come in infographic presentations, but is also their best way to show information to their audience.

The audience that I target in my infographic presentation about gun violence was towards the government like for example the congress the white house and more other people that work for the government, and what this people do for the country is they make the laws around our society so that

people follow and they also make sure that the law is fair to everybody around the US, and how my research that I made about gun violence relates to them because the government made law that control gun ownership around the US to control gun violence but when this laws were made some people agreed to them while others did not and this what cause people to take advantage of this law and that is how gun violence became a international conflict around the US and it was like this since the beginning of the late 1800's to the 1900's in between these centuries there was a lot of casualties due to gun violence and what the government did to in someway prevent more casualties from keep happening they created the 2 amendment and what this law do was in some way give the right to people to own a gun but with certain conditions but after creating this law people stated to take advantage of this law and more casualties spread around the nation. What my audience knows about this subject is that it is concerning but since this conflict has been going on for years they are trying to find a way to stop this conflict around the nation by putting more restrictions towards gun ownership to prevent

more casualties from keep going, but that is were people agree with the government's decisions while others don't and that is what is causing the people to take advantage of the government and not care about the laws but only about their safety and that is what causing more gun violence around the world, and what concerns the government the most is that because of the disagreement that are between the people around the US that at some point people are not going to follow the laws anymore and the government is not going to make sure that their people is at peace and also safe, but also people are going to start making assumptions about how the government doesn't care anymore about the safety of their people and their vote in the government, and at that point the government is not going to put control in their people anymore and laws are not going to be follow anymore and by that time the country is going to be at caos and the government is not going to interfere anymore.

Five traits that are unique to my gender and that I chose are: Organization,informative statistics,specially formatted facts,descriptive title

and subheads, and bold, thematically appropriate color scheme.
