Reflection

I chose Twitter or X because of the availability of tweeting. Many celebrities are known to use Twitter as a way to express their thoughts. Many people communicate with others without knowing each other. I feel like the possibility of people seeing something controversial is important. Talking about something important will pop up in everyone's feed. There are so many different people on Twitter that people of all ages are on the platform. People can all bring their ideas into a thought that may one day change how people see each other. I felt that as people see each other, there are going to be thoughts on what they are and what they look like. People who can influence others have the power to change others. They all sit there and just let hate and diversion happen. Many people decide that they may choose to attack without a purpose. Those things make protests happen.

Twitter relates to every age, as many people use the social platform. I wanted to choose a group of people that like to follow up with the news and Twitter is one of the best platforms. Many individuals use Twitter, and people of all ages. Age does not matter with diversion, as it can happen from pre-kindergarten to elderly homes. As people get older, they get wiser, but things they grew up with do not change, and so does their view of things they see as normal. The target group would be Generation Z, as they will be the future of the world. Many strive to do something with their lives, but they do not understand the concept of being around people who are different from them. I feel people may be brought together within schools to work; there are so many people that are like them, but they do not see the big picture. The audience may know something because there is so much hate going around, from Asian hate to BLM, Islam's war, and many more. People of all kinds get discriminated against, and those who are going to lead the future should know of it and try to protect everyone so those things can be prevented. Twitter is one of the most used apps, and many know of it. Those interested may want to involve themselves with movements and what could be prevented. Even though there might be many protests with each movement, there should be something learned so something can be prevented. Many choose to watch and see the same mistake happening repeatedly.

There were many older people who led the country in a way where people always separate from other cultures. The new generation can lead people into coming in as one. Many people from all separate places around the world come for a reason. As there is not one predominant group in America, people should all see each other as one. In school many kids want to be together with those who speak the same language or look alike. Those can cause a feeling of despise as they may be shunned in a group that is different from them.
