Social Injustice

As you may know we will live in a cruel world where social injustice has impacted our

society I want to make a change not only for me but to live in a better world. As a person who was raised in Brooklyn NY and by two amazing immigrant parents I have seen how loved ones that I know as been killed with no reason and never had there justice for them and seen innocent people getting deported. Let's start with George Floyd who made a big impact for the black community the way this innocent human being was killed was terrifying not only that but it was due to his skin color. For years, black people have always been treated differently due to their color skin it's unbelievable that it

hasn't not change until now. George Floyd was an amazing father, brother, and etc when

I saw the video of how he was like I can't breathe it made me feel so much angrier and

sadness just because a police think they have the right to kill an innocent person they are

wrong. As an society we got united for George Floyd it takes 4 police to take down one black man but they would take us all down if they can justice for George Floyd will be done. No more pain no more hate but for George Floyd rest in peace. This

wasn't the only thing that impacted our society to fight for in this society a young teenager boy who was only 15 years who got killed the most awful way possible made headlines around the world. The way he got killed was due to gang violence but that wasn't the point he got killed by a missing identity even though that was the case the way he got killed was worse than the animal. This is a point of my view of a wrong time wrong place this boy had so much to live for and this does happen on a daily sometimes I wonder to these people who killed have some pure of heart. Like the president

Trump who did the possible to deport "aliens" because he believes every immigrant are criminals. Obama did a program that helped immigrants have a future to keep on studying

and to have more chance in their careers. As dreamers this program did so much for them

it became home for them. Guess who wanted to ruin the program not only Trump who destroyed thousands of dreamers futures, careers, and especially having the opportunities to

get even though they weren't citizens. One thing about the dreamers they weren't going to leave it like that they are going to fight for what is right for the community and for future dreamers. Social injustice has changed in the world we will in with violence with hate, pain, racism, and love for each other like we shouldn't live like this we should be united as a team not as enemies.
