### Artist statement

I picked to do an informational poster for this project. Picking to make up a poster allowed me to highlight all the good and important pieces in my annotated bibliography and while adding small drawings pertaining to my topic of abortions before and after Roe v. Wade to really help bring to life the message being conveyed in the poster also while quoting parts of my annotated bibliography on it as well. It is important for women to be aware of the effects and Roe v Wade's importance on women's right to be able to choose what they want to put their body through. Yes the topic may be controversial and everyone will have their opinions on it but with the correct important information on abortions, being conveyed through an informational poster it'll help educate not just one specific group, but many others as well. especially if it's a way to normalize controversial procedures to benefit women.

## BEFORE ROE V. WADE

In the early 00's there was a slow decline in the rate of abortions due to higher poverty rates and the social circumstances of that time period.

Thousands of women in America were injured, had a loss of reproductive function or even died due to unsafe abortion practices. American healthcare workers were also harassed, assaulted or even killed over performing abortion procedures or having pro-choice standpoints.

There is a correlation between lower class people and higher abortion rates. Studies show that the most significant cause for abortions is financial insecurity.

# SOCIAL, ECONOMIC & HEALTH IMPACTS ON WOMEN

In the late 1990s abortion rates had a rapid decline as women were in better, social, financial and health situations.

TODAY WOMEN IN THE US are more than 14x likely to die from childbirth than a 1st trimester abortion because of Roe v. Wade there are laws put in place that guarantee women rights to the choice of when they want to start their family.

**PROMOTED!** MAY!  
BECAUSE WOMEN now have the choice of when they want to start families, it's allowed them to take the time to find jobs and secure stable careers for financial security.
