

THE INFLUENCE OF THE MEDIA

BY MICHALIS PHOTIOU

INTRODUCTION

According to my research Influence of the media has been here since 1690. They started with news paper, radios , and televisions, but in the start the media was used only for news for the world war 1 and world war 2 but after the wars were over the used it for politicians and for entertainment and the final comedy tv shows that discuss falsely accusations of people to discuss it online. They use these strategies to bring more people in their tv show so they can make money. Unfortunately these thing may cause mental problems.

PROBLEMS

The problems the media does to us is mental problem and spread false news. People are getting tricked and most people that are affected with these problems are the young people at school. They are more likely to spread news and get laughed on from fake news.

SPREAD OF NEWS

Ways of spreading these fake news into the world is by taking the audience guard. Coming home from a difficult day and you turn on your tv you are most likely to hear fake news and believe them. In these way they can spread these news to the world and the other people can spread these fake news further.

SOLUTION & DISCUSSION

Unfortunately there are not too many solutions we can do to stop the spread of the influence of the media.

Whenever you hear something that its even the slighter weird in your ears you can always do a google search for it and do more research based on the news you heard and the topic. If you were already tricked and you were mentality damaged you can always seek a psychologist and they can help you with all the needs
