

Police brutality in all of it's aspects

The real solution to police brutality

Artist statement

- ▶ Police brutality has been something that has existed in our society for a very long time throughout the years. The critical social issue has evolved many times but the bottom line has never changed, which is the brutality that people of color have faced in the hands of the police who are supposed to protect you. This whole research was done to better understand the significant issue that is going around in our society all around us with so many vivid examples of how police brutality has resulted in the death of an innocent black American who did not have to die had the police actually done their job and calmed the situation rather than escalating it and ending in such a tragedy. I want the people in power especially Congress who has the real power to make real change to read my research and see how innocent black Americans have been killed at the hands of the police and the saddest thing of them all is that they were easily preventable especially with George Floyd who was already on the ground handcuffed yet the police officer persisted on keeping his knee on his neck which eventually led to him suffocating to death. The poster in the first slide portrays the picture of how black people are treated at the hands of police and it also shows the things people can do to prevent such things and bring about real change. The main goal behind my research and this multimodal project is to do valuable research on a significant issue and bring forth the facts and present it to the people mainly the people up in capital hill who are supposed to make laws that makes all American citizens feel safe yet the black Americans feels more unsafe today than ever especially when the cops are called since so many cases that highlighted the fact that the cops just suddenly becomes incompetent when it comes to situation revolving around black Americans and thinks that they can just ignore the law and do what they please which has caused countless black male to lose their lives. All of this could be resolved if the people in the capital the congressman and women of this nation would come together to enact laws that would prevent something like George Floyd's murder to ever take place only they hold the true power to bring about real change that all of us have been longing for so long which is to see a police force that does not act with aggression the moment they see black American and therefore that is the dream world that I or anyone else in my shoes would want to see their kids grow up in. In the end I want to leave anyone who is reading this and the people in congress with a request to write laws that would prevent such a horrendous act of aggression and murder to ever take place again in this grateful nation that we call the United States of America home where the flag of freedom should fly above everyone's head and should not make any exception when it comes to black Americans.
