# What is Police Brutality ?

Police Brutality is another form of police violence but it is more extreme. It involves physical harm or even death to a person.

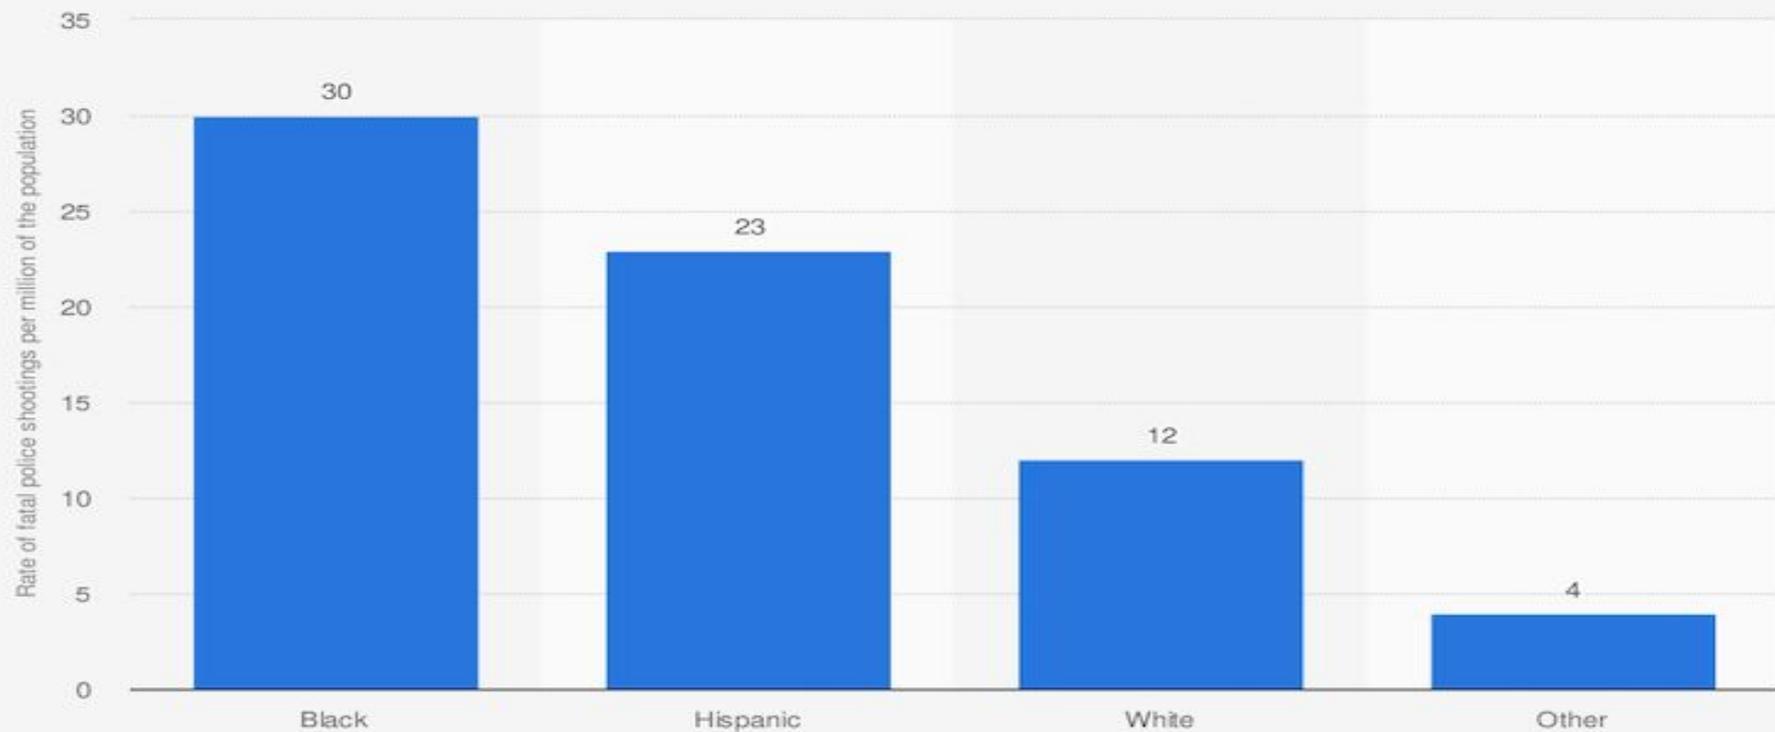

# Who is affected the most by Police Brutality ?

Young black men are usually affected the most. Black men are 2.5 times more likely to get killed by a police officer than a white man which isn't surprising. Police officers tend to use force on black men such as kneeling on their neck or even putting them in a chokehold which would result to them dying.

# How are people in the black community affected mentally by Police Brutality ?

Anyone who survived police brutality or lost a loved one from being killed by a police officer deals with a lot of stress and anxiety. Black men and women are scared to go outside or get into an altercation with a police officer because they don't know if they are going to make it home alive. Also, we get tired of killings by police officers so it turns into protest and violence.

# END POLICE BRUTALITY !!!

- Be more vocal by spreading the word on social media or start protesting to be heard.
- Post videos of police officers abusing these black men so they could get punished.
- Show police officers the type of trauma they leave in others lives.
- Have friendly protests showing what affect police actions have towards hundreds or even thousands of people (come together as a black community)
