

BRIDGE SAFETY INSPECTION

Training Requirements

- Company: Hardesty & Hanover LLC.
- Duration – through the end May 2023.
- Minimum qualifications: Associate Degree in Civil Engineering Technology or an equivalent Associate Degree determined to be acceptable by the Department, or 18 months of bridge experience in design, construction, inspection or other bridge-related work. Acceptable bridge experience will be determined by the Main Office Bridge Inspection Unit on a case-by-case basis.
- Trainees are encouraged but not required to take and pass the NICET I and II examinations within the training period. Expenses associated with the examinations are reimbursable through company expenses.
