Computer Systems
Technology Department (CST)

05/09

12pm—1pm

Amira Dhalla works on issues related to digital rights, privacy, security, and equity with global organizations and communities. Together, she works with educators and activists to design participatory curricula and resources to make emerging technology more inclusive, open, and safe. Currently she's focused on the intersection of security and collective care, developing models for how we care for our communities among emerging technologies. While also tackling topics like discriminatory technologies, surveillance states, deceptive design, and trust and safety.

Deceptive Designs and Data Ethics
