

Final Podcasting Project

In groups of 4-5, develop a **20 minute podcast** on a topic related to Gowanus and some of the themes (environment, culture, urban renewal, transit, zoning, sustainability, resilience, waterfront revival) we've explored so far this semester.

Each group will be responsible for the content, format, and technical delivery of the podcast.

Examples of podcast formats include:

- Historical Narratives
- Walking Tours
- Interviews
- Panel Discussions

In addition to creating and editing an audio recording, each group will:

- Strategically incorporate or reference *at least two* relevant resources.
- Select an image to accompany your podcast with a license that permits reuse.
- Provide basic metadata for your podcast including *at least three* descriptive keywords.
- Select a Creative Commons license to dictate how your podcast can be used by others.

This activity will be completed in 4 stages

1. planning and prewriting
2. research and script development
3. technical production
4. reflection

Rubric for evaluation

- Clarity of thematic focus 25%
- Research extent 25%
- Critical engagement with course themes and research materials 25%
- Quality of final artifact 25%

This final project is worth 15% of your overall grade for the course.
