

General Questions:

► **What things did you think went well on the project?** *(Answer the following in 2-3 sentences)*

I think that the modd board went pretty well on my end, I feel as if you get a decent idea of what I was going for.

► **What was the single most frustrating part of the project?** *(Answer the following in 2-3 sentences)*

Tracking down some of the sources for images was frustrating at times. I was really trying to squeeze out as much info as I could, but sometimes there is only so much you can decipher and find out for yourself. Even with the internet at my disposal.

► **How would you do things differently next time to avoid this frustration?** *(Answer the following in 2-3 sentences)*

I would definitely try and add creative commons and license descriptions along with the search term I would be looking for. For example if I was trying to locate a wifi symbol I would probably add “creative commons” to the search term so I could get more information.

► **Were there any other issues/changes that should be considered? Please offer suggestions for methods of improvement.** *(Answer the following in 2-3 sentences)*

I took into consideration what my colleague said and I feel as if I might not have been descriptive enough or have given enough imagery to understand my concept. I will definitely include more detail and attack things from every angle.

► **Iterative Solution 1: Based on your design critique, provide an additional solution to the design problem at hand.** *(Answer the following in 2-3 sentences)*

Carlos mentioned motion sickness from using the application, I really thought about it and to solve the issue I might add some type of stabilization if there seems to be a lot of movement going on.

► Accompanying Outcome 1: **Based on your design critique, provide an additional outcome to the design problem at hand.** *(Answer the following in 2-3 sentences)*

With this new stabilization feature I believe that the scope of people who would use the application widens even further. Thus creating a broader user base, and possibly more support or even money if the app uses ads or isn't free.

► Iterative Solution 2: **Based on your design critique, provide an additional solution to the design problem at hand.** *(Answer the following in 2-3 sentences)*

Another critique I received was to add more information. To solve this aside from the obvious, I figured that maybe I could have went beyond the call of duty and provided some type of graph to show what the application would look like.

► Accompanying Outcome 2: **Based on your design critique, provide an additional outcome to the design problem at hand.** *(Answer the following in 2-3 sentences)*

The outcome here would be a more informed person, possibly even an investor had this been a fully functioning service.
