

A photograph of water flowing over a textured surface, possibly a drainage grate, with a semi-transparent text overlay. The water is dark and rippling, reflecting light. The surface it flows over is a light-colored, textured material. In the bottom left corner, there is a metal grate with parallel ridges. The text is centered in the middle of the image.

Election Project

When I got the midterm project, I have no idea of it. This is my first time that I experience America election. When I wander around the New York City, I notice that people are eager to politics. I saw people put many memo paper on the politics wall in Union Square Subway station. The wall became very colorful and gives me a sense of freedom. Besides, people have a sense of humor to convey their attitude of politics. For example, the beggar will wear a mask to pretend Trump. When I told him that I was doing the election project, he showed the famous gesture that Trump always shows. When Trump became the president, many people gather together to anti him. I took a shoot that the man put a sign that Trump is now president; Need money to leave. I think the election makes the city very vivid and interesting.

Pyramid Shape Shot

We are learning how to use different background to take portrait shot. The professor was very patient to teach us how to use different transparent colorful paper to change the tone. I have learned a lot and known the importance of team working.
