

WEEK: 8

LAB: 6

Lab Title: Satellite Communication Software From Internet

a. Software Description:

You will be providing this information

b. Objective:

The purpose of this lab is for you to learn how to obtain satellite communications related software from the available resources on the web. The software that you will be searching for should have the following characteristics:

1. Related to satellite communications.
2. Requires students' observations of the results.
3. Would demonstrate technical discussion of the results.
4. Demonstrate students' understanding of the topics discussed in the lecture part of the course.
5. Is long enough to last for the period allocated to the lab and if it needs more time, it is made into parts.

c. Procedure:

- Download procedure
- Experiment procedure
