

JARVIS

“A SMARTER HOME MEANS A SMARTER YOU”

Product Description

Jarvis is a home automation company founded in 2008 by Richard Matos. Our main focus is to give you the power to control your home from anywhere and have information at your disposal at all times. To accomplish this fete, we will employ a number of hardware solutions and software solutions including Bluetooth 4.0, WiFi, GPS, NFC, Motion sensors, proximity sensors and Video Equipment. Our full line of products are also enhanced for mobile devices with iOS & Android support.

- **Jarvis Home:** Product Value \$30,000, Selling Price \$20,000: Currently not many options in the home automation business, with Jarvis we plan to change all of that by targeting a larger group of people with affordable pricing. Control your home with your every command by simply speaking to it; access our large database for quick up to date information. Need the weather in the morning? Want to get the shower running before you get out of bed? Just ask Jarvis. We want it to feel like your home is very much alive and is there to assist you.
- **Jarvis Mobile:** Product Value \$20, Selling Price \$10: What if you're not home? Not an issue you will not lose any benefits with our Jarvis Mobile app; changing the temperature, controlling the lights, and heating the oven while your away is a simple click or voice command away. This is an extension of Jarvis Home giving you the option of mobility. With this application you will be able to access your home remotely from any location. Our GUI is simplistic and stylish. Don't want to click anything? Speak to Jarvis Mobile as if you would at your home.
- **Database:** Product Value \$100, Selling Price 0: Included with Jarvis Bundle. The backbone of Jarvis, the database will be used by Jarvis to retrieve information from the internet. Our servers will be dedicated to handle the traffic from high use. Examples of how Jarvis would use our database would be: Retrieving weather information and reading it out to you when you wake up or asking it what time the Giants game starts. It will speak out and display this information to you using our display panels or projections.
