TABLE OF CONTENTS

Introduction

The Sims 3 inspires you to play with life with endless possibilities - create anyone, take them anywhere, and share them with everyone. Send your Sims out to explore new locations and prepare yourself for unexpected moments of surprise and mischief.

-The Sims 3, released in 2009 for Mac and PC, and in 2010 for Wii™, Playstation® 3 computer entertainment system, and Xbox 360® videogame and entertainment system and 2011 for Nintendo 3DS™, is a simulation game that gives anyone the tools to play with life. The freedom of The Sims 3 allows for endless creative possibilities to amuse players with unexpected moments of surprise and mischief! Players can create unique Sim characters and control their lives, customizing everything from their appearances, to their personalities, and even the home of their dreams.

-Players can also send their Sims out to explore new locations around town and to meet other Sims in the neighborhood. The Sims 3 offers an online community where players can go online to download exclusive content and show off their own creations to the world. With quick challenges and rewarding game play, The The Sims 3 gives players the freedom to choose whether (or not!) to fulfill their Sims' destinies and make their wishes come true.

Create-A-Sim

Create any Sim you can imagine and give them unique personalities! Fine-tune your Sims' appearances and personalities. Will your Sims be Evil, Romantic, Paranoid, Kleptomaniacs, or more. You choose the traits to create completely unique Sims.

The Sims 3 has the most advanced version of 'Create A Sim' in any of the series games so far with new tools like the "Create a Twin" and Create a Style, more skin tones, and body shape sliders.

To create a Sim, the player will be immediately presented with a tab at the bottom left of the Neighbourhood screen labelled 'Create Sims'. Click this and it will immediately load the Create-A-Sim screen. As in previous The Sims games, a household holds a maximum of eight (8) Sims. At the bottom of the screen are thumbnails displaying the current Sims existing in the household.

By clicking on a Sim's thumbnail, a pop-up appears giving the option to edit, delete, save or share the Sim. A new feature added to the series, which can be selected from this menu, is the option to Create A Twin. By clicking this button, an identical version of that Sim appears in order to make identical twins, which can then be customized further. Beside the last Sim's thumbnail, there is a 'plus' button which adds a new Sim. Once this is clicked, the current Sim is saved and the new Sim is ready for customization. This button is disabled once there are eight Sims as is the Create A Twin button.
