### The Spring Flower Show

NYC has always been know to be the best city, NYC is one of the places where you must be. What you would always see is a person with a camera taking pictures, the most appealing place is Times Square. There so many vibrant colors in the city pink, yellow ,green, orange, red, purple and so much more. Walking down Times Square you may spot a Macy's and there you would see what is Called The Flower Show. The first thing you would notice is the colors you can't miss them each window has something different. The theme of these images are “ Once Upon A Springtime.”

When I think of spring I think of warm bright colors this first photo gives you like a Alice in Wonderland vibe. The flower colors pink, green, white, blue and red are in different places it also includes a white bridge in the middle. This is a reflection photo captured in the day time you can see right through it on the top you'll spot the Hotel Mcalpin building. In the photo most of all the colors match pink flowers on the left top while down below their white, purple, green and pink flowers. The middle of the photo has a blue color detail that makes the image more appealing just imagine it as the ocean. The white bridge in the middle has red and little white flowers coming out of it there's also three green trees, two of them are circle they look more like mushrooms and

the other looks like a animal face. On the very top there's also light pink flowers that look like vines.

Photo two is also captured in the day time it's also a reflection photo but this one gives you a medieval times vibe this photo includes a green colored horse with a knight on it. The colors included in the photo isn't much bright as the other but they all are the same color. Photo one has the bright colors while photo two has the dark colors. The knight and the horse are surrounded by green leaves purple,red,and blue flowers, the knight and the horse looks like its ready to take off. The knight also has a silver spear in its hand surrounding a red and orange dragon's tail. The silver spear is pointing at the Life Hotel building. Since its transparent you can also see a white car in the background the red Santander bank sign and a black and white Duane Reade sign.

The Studium of photo one is warm colors it makes it more interesting because it's transparent It's visible so you can tell all the details in the photo. This photo was taken about 6 o'clock on 34th street with a Iphone 7 plus.The weather on this day was pretty sunny you can identify by the shadow next to the Hotel Mcalpin building. You can see in the bottom of the photo there's a person walking in the Shot. The dominant impression of this photo is calm and relaxing it makes you just want to just look at it all day because the colors are so warm. It gives you fansty vibe like your in a garden the bright flowers give that effect. The image changes your mood it makes you feel like its actually real and your in the photograph. The photo is saying spring all over it you can smell the freshness

of the flowers. The photo also looks unreal you don't see these type of flowers everywhere or just the image in general.

I saw this photograph to be a art photo an art photo doesn't always have to be a painting or a drawing it could be photography too. The image has different shade of colors that make me think of a actually painting. All the colors fit each other the blue makes makes the photo alive In art its all about the right colors or shades you use to make every detail stand out.

The studium in photo two is a mixture of dark and a little light colors. The photo was also the same time as photo one it was also sunny but you can't see any shadows. You can see a person in the reflection of the green horse. The dominant impression of this photo is mysterious You want to know what's going on in the photo or why is it apart of the flower show or why is their a green horse a knight and a dragon tail. It makes you want to ask questions because these things have nothing to do with spring. You can also say curious if your questioning the photo.

In the book *The Places Where We Dwell* the article "Understanding a Photograph" by John Berger he says " It now seems clear that photography deserves to be considered as though it were not fine art"(291). A image doesn't have to be a painting for it to be called a art photo. Looking at my Photos I thought I couldn't call this a art photo. Berger also mentions " The true content of a photograph is invisible, for it derives from a play, not with form, but with time. One might argue that photography is as close to music as to painting"(293). You can connect a meaning to your photo to anything everyone has a different way of expressing a photo.
