Bias cut dress

Using the bias cut method means to move the fabric in a 45 degree angle and using this fabric diagonally to use maximum stretch. This ultimately accentuates every curve in a body.

A-line dress

This type of dress is tight along the waist/hips and widens as it goes down. Giving the garment an “A” shape.

Mermaid Dress

This dress fits closely on one's torso and hips and flares out towards the bottom. This gives the garment an "fishtail" appearance.
