Signing on to WeBWorK:

- Go to mathww.citytech.cuny.edu/webwork2

  Or you can go to the class blog at https://openlab.citytech.cuny.edu/shavermat1275spring2017 and click on the WeBWorK link in the sidebar or the post of the day.

- Click on the link MAT1275-S17-Shaver if you see a list of classes.

- in the login screen, enter your user name and password. Your initial user name and password are the same thing: your first initial followed by your last name, all lower-case. [For example, my login is sshaver.]

- **Very important:** Once you are logged in, go to the User Settings link on the left side of the page under "Main Menu"' and change your password

- **Do not change the email address**: only your City Tech email address may be used for communication in WeBworK. If you do not see an email address in the User Settings, you should enter your City Tech email address there.

Once you have completed the steps above, look at the Orientation assignment. When you open the assignment, look over the page carefully. Look first at the information given in the box at the right side of the page. Then you can start working on the problems. This assignment is designed to familiarize you with WeBWorK and how you enter your answers. You can keep playing with this Orientation assignment throughout the semester whenever you feel the need.

Note: Usually, the assignments will always be due 11 PM the night before the next class meeting after they are assigned. Start working well in advance of the due date and time so that you can have time to redo problems whose answers are incorrect, and so that you will not have to rush. (Please consult the course information sheet for policy on extensions.)

You may usually resubmit a new answer to a problem if you get it wrong. If you need to redo any problem, you can and should consult your notes, the textbook, discuss with another student, post questions to the Piazza discussion board, etc. before you submit a new answer. Note that usually each student will receive a different version of the problem, although they will be similar.

At the bottom of each assignment is a button you can use to email me if you encounter any difficulties using WeBWorK or if you believe that your answers are correct but they are being marked wrong. Please do not use this to ask how to do a problem: rather, just for questions related to WeBWorK itself.
