

Thinking strategically about the next Test

Please answer these questions honestly. You are the only one who will see your answers!

What grade do you want to get on the next test?

How important is it to you to achieve this grade? on a scale of 0 to 5

How confident are you that you will be able to achieve this grade? on a scale of 0 to 5

Think carefully about the kinds of questions that might be asked on the next test.

With those types of questions in mind, which of the resources available to you will you use to help prepare for this test? (Put a check mark by them. But choose carefully! Choose the things you think you will really use and which you think will be helpful.)

Resources:

- OpenLab blog
- WeBWorK
- Piazza
- Instructors' office hours
- Math specialist tutoring
- Paul's Online notes
- Videos (PatrickJMT or Khan Academy)
- Your classmates!

For each of the resources you have chosen, think about how you can best make use of it and write down your strategy here: (some examples follow for you to think about, but you may have other ideas!)

Some examples of strategies for using the resources:

But you don't have to use these, they are just to get you started!

- Reworking past WebWorK problems
- Going to the Math specialist tutoring prepared with problems I need to work on and exactly where I need to work on them
- Viewing the videos linked on the OpenLab blog and then test myself with problems
- Study the solutions to the past Quizzes posted on OpenLab
- Test myself with the problems in Paul's notes or Khan Academy
- Work practice problems together with a peer or a group of peers
