Nearly 2,000  
nail salons  
in the city

What you may consider to be a beautiful moment of self-care can actually expose you to an alarming number of chemicals and toxins that damage your health.

By innovating beauty salons to become organic, eco-friendly and sustainable can not only be committed to your natural beauty but also your well-being and a happy planet.

They may say beauty is pain, but beauty shouldn't be illness. It shouldn't be cancer.

# Safer work environment

Nail salons have to take cleanliness and sanitation quite seriously.

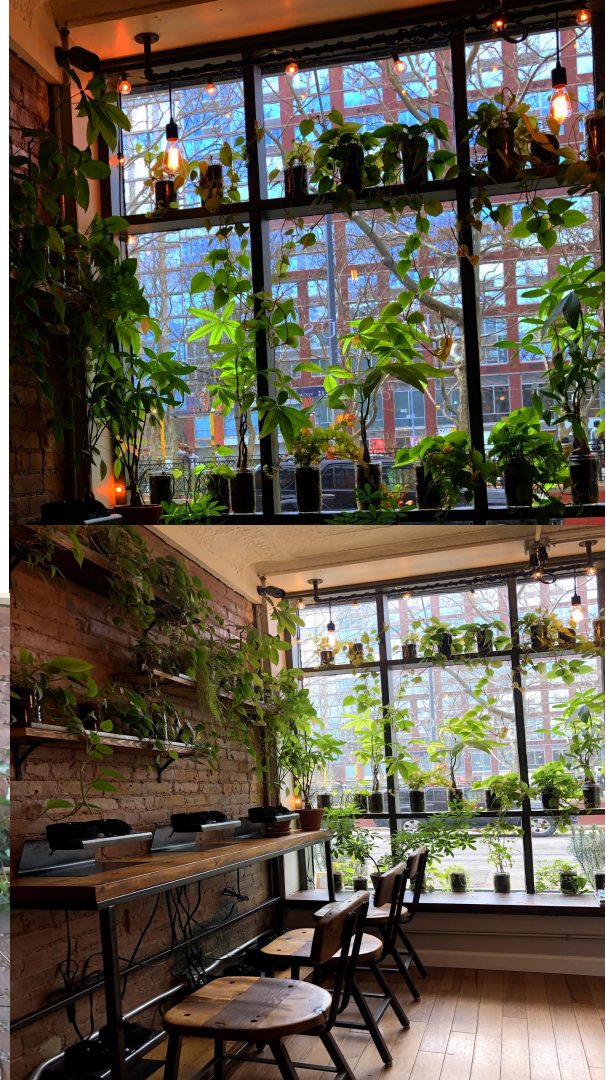

# Plants

create a cozy vibe

Clean air

Relaxation

Reduce noise

# Organic products

A better way of caring about offering products that are healthy organic, safe to use, cruelty-free and never tested on animals.

# Healthy life

# Waste: nail salons

For nail salons, properly handling the waste streams involves the following:

- Properly storing spent materials.

- Maintaining appropriate storage areas

- Understanding your hazardous waste generator requirements

- Properly training your employees

- Ensuring that your materials are shipped to licensed Treatment, Storage and Disposal Facilities (TSDF)

# Thank you
